## 1 P R O C E E D I N G S

2 MR. BOWERS: All right, ladies and  
3 gentlemen, we will get started. Our clock over  
4 here is about two or three minutes fast.  
5 Actually, hold on second. We've got one director  
6 call.

7 (Pause.)

8 MR. BOWERS: All right. I want to say  
9 good morning to everyone. Welcome. This is the  
10 Housing Production Trust Fund Advisory Board  
11 meeting for Monday, April the 7th, 2014. We will  
12 officially call this meeting to order at 9:30  
13 a.m.

14 I am David Bowers, Chairman of the  
15 Advisory Board.

16 The first thing we want to do, just in  
17 terms of some housekeeping notes before we make  
18 sure we've got a quorum here, one is to remind  
19 people that this is a public meeting and it's  
20 being recorded. We will also ask in that spirit  
21 that, we do not have microphones. Unfortunately  
22 the microphones went a little bit on the blip for

1 us, so we're going to ask you to make sure you  
2 speak up. These mics you see are mics that are  
3 capturing and recording the information for the  
4 transcriber for the records, but they won't  
5 amplify. So please make sure to speak up when  
6 you speak.

7           The other thing we'll ask is when you do,  
8 the first time you speak if you could, please,  
9 just announce your name? That would be helpful  
10 for us.

11           Another housekeeping note, restrooms, I  
12 think most people know are right outside the door  
13 to the left, men's and lady's room, right outside  
14 to the left.

15           We will take a break at 11:45, but we'll  
16 power through until then so obviously if you need  
17 to get up, stretch, or use the facilities, please  
18 feel free to do so. We will have a few more  
19 snacks, but no lunch, unfortunately, at break  
20 time. But we'll give you a few more snacks to  
21 get you through until the end.

22           For those of you all, we hope everyone

1 can stick with us until 1:00. For those who may  
2 need to leave before then, you can -- you'll see  
3 on the agenda at the bottom is an e-mail address  
4 from Ms. Bee Fields. And so you can send -- if  
5 there are some comments you didn't get a chance  
6 to make, you can send your comments there.

7 We'll also say as well, for members of  
8 the general public who may be here, and if you'd  
9 like to send in comments, suggestions,  
10 recommendations, you may feel free to do that as  
11 well, to Beatrix, B-E-A-T-R-I-X, dot, Fields, at  
12 DC.gov.

13 As we go through the meeting during this  
14 part, we'll have -- this is our stakeholder  
15 engagement meeting. The folks who are at the  
16 table are going to be the folks we'll ask to be  
17 responsive as we go through.

18 Let me now ask if we can have the members  
19 of the Advisory Board -- we'll do a quick roll  
20 call to make sure we have a quorum. So, David  
21 Bowers is here. Other members, we'll just go  
22 around. If you're a member of the Advisory

1 Board, you can just state your name, please.

2 (5)MS. NEWSOME: Oramenta Newsome, here. (1)

3 (1)MR. PASCAL: Craig Pascal, here. (2)

4 (10) (7) (4)MS. MARSHALL: Sue Marshall. (3)

5 (6)MR. POHLMAN: Bob Pohlman. (4)

6 (3)MR. KNIGHT: Jim Knight. (5)

7 (8) (9)MR. ROODBERG: David Roodberg. (6)

8 (1)MR. BOWERS: All right. Seeing that we

9 do have a quorum established we will move

10 forward. Thank you all.

11 Let me also, so I don't forget, let me  
12 just say at the beginning, a huge word of thanks  
13 to the DHCD staff, Beatrix Fields, Angela  
14 Nottingham, Pamela Hillsman, and the IT team.  
15 Bee and Angela and Pamela were extremely helpful,  
16 Director Kelley, in terms of helping us pull this  
17 together, which was no small feat. So I want to  
18 say on the record, thank you to them ahead of  
19 time.

20 I also want to thank Jim Knight, Oramenta  
21 Newsome, and Stan Jackson, Board members who  
22 helped also kind of behind the scenes with

Absent Prior (8)

Jackson? (9) (2)

1 thinking some of this through. So I wanted to  
2 make sure to just acknowledge those folks as we  
3 began.

4 Just to set the stage very briefly, our  
5 Housing Production Trust Fund Advisory Board as  
6 currently constituted, was sworn in by the mayor  
7 last summer. The statute calls for the Board to  
8 advise mayor on the development, financing, and  
9 operation of the fund, and other matters related  
10 to the production of housing for low income, very  
11 low income, and extremely low income households.

12 The Board may review the uses of the fund  
13 for their conformity with the purpose of the Act,  
14 and the Board shall have reasonable access to  
15 records related to the fund to perform this  
16 review.

17 Now a few key points about trust fund  
18 dollars. The statute calls for 40 percent of the  
19 money to be used to create housing for extremely  
20 low income households. That's for households  
21 making below 30 percent of AMI, 40 percent to be  
22 used to create housing for very low income

1 households, 30 to 50 percent, and at least 50  
2 percent for rental housing.

3           So why are we here today in this context,  
4 or this configuration. So the Bridges to  
5 Opportunity, a New Housing Strategy for D.C.  
6 Report, as many of you all know was issued by the  
7 Comprehensive Housing Strategy Task Force in  
8 early 2013, and there were three high level  
9 strategic goals. Preserve approximately 8,000  
10 existing affordable housing units with federal  
11 subsidies that will expire in 2020, produce and  
12 preserve 10,000 net new affordable housing units  
13 by the year 2020, the 10 by 20, and support the  
14 development of 3,000 market rate units annually  
15 through 2020.

16           In 2013 Mayor Gray publically embraced  
17 it, in particular the 10 by 20 goal, and a good  
18 deal of the city funding targeted to help achieve  
19 these goals has been designated for the Housing  
20 Production Trust Fund Advisory Board.

21           So as you'll see up here, in terms of our  
22 stakeholder meeting goals, what we want to

1 accomplish today, really, one is to identify any  
2 specific recommendations for the Trust Fund  
3 Advisory Board consideration. We are meeting  
4 monthly, currently, and are looking to try to  
5 bring recommendations to the Agency and to the  
6 government in large that may assist with getting  
7 to the goals that you have heard about.

8           The second thing we hope may happen here  
9 today is identify specific recommendations for an  
10 agency, a company, an organization, or a group  
11 consideration.

12           So some of you all, from your individual,  
13 whether it's a bank or a development entity, for  
14 your agency, you may hear something, you may be  
15 able to move on. A number of us are members of  
16 different types of working groups. The leverage  
17 working group that was convened by Oramenta  
18 Newsome at LISC, the Metro Bankers Group for  
19 example, there are a number of different working  
20 groups the Affordable Housing Action Team at the  
21 Washington Regional Association of Grant Makers.

22           There are a number of different working

1 groups in town and so we're hoping also that out  
2 of this conversation you may hear some specific  
3 recommendations that you can take back to your  
4 individual institution or a collective group that  
5 may be working together.

6           And finally obviously just some one-on-  
7 one connections where people may be able to move  
8 on specific recommendations.

9           So as you see here in terms of how we'll  
10 kind of lay out the conversation today, looking  
11 to identify barriers that exist, identifying  
12 resources that are available, and identify the  
13 steps that can be taken to meet the goal. I  
14 don't want to beat this drum too long, but I will  
15 say that this is not just an academic exercise;  
16 not just an exercise in kind of policy making if  
17 you will, but as we all know it's a great town, a  
18 great city to live in, and we're all blessed, you  
19 know, to be here.

20           But we know there are some very serious  
21 struggles that people have. Over 50,000  
22 households in this city are paying more than 50

1 percent of their income for their housing costs.  
2 We all have heard a lot of news about the  
3 homelessness issues, et cetera. So there are a  
4 lot of our fellow citizens, residents, who are  
5 very much struggling as it relates to their  
6 housing situation.

7           And so this meeting here today was  
8 designed to try to get a number of different  
9 players in the room. From the government side  
10 you'll see the dark blue cards, developers with  
11 the yellow cards in front of you, the folks from  
12 the financial end of town will have the green  
13 cards in front of you. That was just a  
14 coincidence, Tom Nida. So, a coincidence there.  
15 And then the light blue from folks from  
16 philanthropy.

17           So this meeting was designed to get as  
18 many of us in the room as we could to try to air  
19 some of these issues out collectively so that we  
20 can move forward with some -- so people can hear  
21 from one another at the same time today.

22           So, before I turn it over to Dr. Kathryn

1 Howell, I just want to say as we go through the  
2 day that's led by our facilitator, Marisa  
3 Flowers, please keep in mind these goals that we  
4 have.

5 I will say as a person who loves words,  
6 the power of words, and the use of words, Jim  
7 Knight, we want to be succinct with our words  
8 today and be very focused with our words today.  
9 We have a chunk of time allotted, people, so we  
10 definitely want you to speak what you need to do,  
11 but we don't need speeches. We do want those  
12 succinct, kind of to the point. So Marisa will  
13 keep the trains moving as it goes there.

14 We do also again want to thank the folks  
15 who are here to help us with capturing, so you'll  
16 see folks who will be scribing. And they're  
17 actually going to compile some of these things at  
18 the break time and then in our last part of the  
19 time together we will work on moving towards real  
20 specific recommendations.

21 Before I turn it over to Dr. Howell I do  
22 want to ask Director Kelley, we are here at DHCD

1 as our host. If you want to say a quick word of  
2 just welcoming us to the house and then we'll  
3 move on. Director Kelley.

4 MR. KELLEY: Jim Bowers and to the  
5 Housing Production Trust Fund Advisory Board,  
6 welcome and thank you so much for the very  
7 important strategic exercise here.

8 Our recognition and the Chairman  
9 mentioned a moment ago about the hard work that  
10 went into putting in to the Bridges of  
11 Opportunities and the kinds of laying the  
12 foundation for what it needs to continue to make  
13 this a diverse and inclusive city through  
14 affordable housing.

15 And so I think one of the things that we  
16 have been charged at DHCD is to look to make real  
17 and through our programs to keep pushing the ball  
18 on things like the Tenant Opportunity to Purchase  
19 Program and the various programs, that are really  
20 talking about in many ways, production.

21 And so I welcome the opportunity to  
22 follow up on this, Chairman. And again, as you

OLENDER REPORTING, INC.  
1100 Connecticut Avenue NW, #810, Washington, DC 20036  
Washington: 202-898-1108 • Baltimore: 410-752-3376  
Toll Free: 888-445-3376

1 mentioned before I do want to do a shout out to  
2 the hardworking men and women at the Department  
3 of Housing and Community Development.

4 MR. BOWERS: Great. Thank you, Director  
5 Kelley. I appreciate it.

6 Also, please, if you have a cell phone,  
7 please make sure to put it on silent or vibrate.  
8 We appreciate that.

9 So here is how we'll proceed. Dr.  
10 Kathryn Howell is a research fellow, George Mason  
11 University, Center for Regional Analysis. We've  
12 asked her to take about 10 minutes to create some  
13 framework from a data standpoint if you would,  
14 and we'll have about five minutes for a Q and A  
15 with her when she's done and then we'll move to  
16 Mr. Youngblood from Deputy Mayor Hoskin's office  
17 and then Director Berns.

18 MS. HOWELL: All right. I'll stand up a  
19 little bit because I'm kind of short. You might  
20 not be able to see me.

21 All right. Well, I want to apologize,  
22 first, my boss, Dr. Steve Fuller can't be here

1 today. He's traveling and he's much better at  
2 doing these presentations than I am, but here I  
3 am. So this presentation is kind of put together  
4 of about three different reports, which is Dr.  
5 Fuller's report on jobs in the region, and then  
6 the housing, the Region's Workforce, and then a  
7 report I did on multifamily housing in the  
8 region.

9           So I've got kind of a 30,000 foot level.  
10 I mostly am trying to focus on D.C., but I do  
11 have some regional context because I do think  
12 that's important for what you're doing and  
13 definitely for housing in general.

14           So I'll talk a little bit about the rents  
15 and sales prices as they kind of currently stand  
16 across the city, jobs coming to the city in the  
17 next 10 years, and what their pay is going to be,  
18 where people might live, and so I have about 10  
19 minutes. So I will try to be quick and also  
20 useful at the same time.

21           All right. So these are the contract  
22 asking prices for new condos in the third quarter

          OLENDER REPORTING, INC.  
1100 Connecticut Avenue NW, #810, Washington, DC 20036  
Washington: 202-898-1108 • Baltimore: 410-752-3376  
Toll Free: 888-445-3376

1 of 2013, and they've kind of stayed very similar.  
2 I've got it for the region but we're on the left-  
3 hand side here. It really ranges. As you know,  
4 we didn't lose as much ground as other places did  
5 in the downturn, so that's kind of good if you  
6 own a house, not so good if you're trying to buy  
7 one. So they really range from you know, over  
8 1.6 million in upper Northwest, to 300,000 sort  
9 of east of the river, Hill East. So it's really  
10 pretty wide range but we still outpace our  
11 neighbors largely, with the exception of  
12 Arlington and Alexandria.

13 All right. So, in spite of some of the  
14 comments that what we've heard -- I've heard  
15 anyway, from folks that we've overbuilt, rents  
16 aren't really telling us that. The average rent  
17 for new Class A buildings in D.C. is above \$2,500  
18 a month. For Class B it's above 1,800 a month.  
19 So it's still keeping pace, and again we are  
20 beating out our neighbors in all fronts in terms  
21 of cost of living here, which is tricky for a lot  
22 of folks you guys are dealing with.

OLENDER REPORTING, INC.  
1100 Connecticut Avenue NW, #810, Washington, DC 20036  
Washington: 202-898-1108 • Baltimore: 410-752-3376  
Toll Free: 888-445-3376

1           But jobs aren't really keeping pace. So  
2 there's another chart that I'm going to explain  
3 that's unfortunately not here, but talks about  
4 the jobs that are coming to the D.C. region. And  
5 it has three bars, and those are the thirds of  
6 income bands.

7           And you see big growth in the top, big  
8 growth in the bottom, and no growth in the middle  
9 section. So we are not gaining middle income  
10 jobs, we are gaining working class jobs and high  
11 income jobs, which create some problems for  
12 housing.

13           And this shows the job requirements, and  
14 more than a third of the new jobs coming in are  
15 requiring short-term on-the-job training, and  
16 those are jobs that are earning about, on  
17 average, \$15 an hour, and this is just for D.C.,  
18 which translates to about \$31,000 a year. So  
19 that's the average wage for these new jobs that  
20 are coming.

21           And then the other group, large group of  
22 jobs, about 28 percent, which is bachelor's and a

1 little bit of experience, those are betting  
2 paying at about \$50 -- excuse me, \$35 an hour,  
3 which translates to about \$70,000 a year.

4           And these jobs, the higher wage jobs, are  
5 largely in business services, professional office  
6 jobs, and education and healthcare. And those  
7 education and healthcare jobs are not jobs with  
8 PhDs and they are not necessarily teaching jobs,  
9 they are working in the universities for service  
10 staff, healthcare, home health aides. There's a  
11 big growth and demand for home healthcare, as we  
12 all know as the aging population ages.

13           And so these are not necessarily your  
14 high paying jobs, and they are not necessarily  
15 concentrated in the city or in particular  
16 downtown areas. So they are kind of dispersed  
17 across the region.

18           Government employment, as you may have  
19 heard, is declining, and that's largely -- it's  
20 not that they're cutting jobs as much as they're  
21 just not backfilling the existing jobs as people  
22 retire. So that's part of that issue with that

1 stable middle income group that is not growing.

2 All right. So this is just a map to show  
3 you a little bit of context of -- the top map is  
4 the demand for homeownership units. If everyone  
5 decided to live where they work, live in the same  
6 jurisdiction they're working in, so that gives  
7 D.C. -- sorry it's so small, but we're kind of  
8 small in the region, right? But that's 19.7 --  
9 excuse me, 19,700 new home ownership units in the  
10 city by 2032. That's a 20 year span from the  
11 time we really started doing this research.

12 And that's like I said, if everyone  
13 decided to live -- you know, they got a job in  
14 D.C., they're living in D.C.

15 The bottom map shows sort of business as  
16 usual. If we continued the same commuting  
17 patterns that we've got now, that disperses the  
18 jobs and we have -- or that disperses the housing  
19 and that's 18,000 new home ownership units.

20 And you can see, so there's sort of two  
21 different problems, right? If we do one we need  
22 more housing units, if you do the other one we

1 need to address our transportation problems. So  
2 both are sort of costs for the region, it's just  
3 which -- sort of picking your poison.

4           And this is the housing demand by income.  
5 These are -- rental units are in black and home  
6 ownership units are in purple. For those who are  
7 earning less than \$49,000, that translates to a  
8 rent of about 1,250 a month. The demand is about  
9 14,000 new units. And these are for new  
10 households. This is not what you guys are  
11 already doing, this is not what's going on now.  
12 This is net new households.

13           So that's 14,000 to house the net new  
14 households that could be coming into D.C. And  
15 then that gets -- obviously the number of units  
16 gets smaller, 4,300 for those between 50,000 and  
17 74,000 a year, which translates to about 1,250 to  
18 1,300 a month. And then 600 units for those over  
19 75,000 to 100,000, which is that sort of the  
20 higher end of the workforce spectrum, 1,300 to  
21 1,750.

22           For sale units -- oops. Somehow the for

1 sale unit did not make it here. Oh, no, they  
2 did. It's on the same graph. My apologies. I  
3 thought I had a separate one.

4 So that for sale, 1,600 units need to be  
5 sold for less than \$200,000 a year. And that's  
6 really kind of where you guys are really working.  
7 And that's kind of decent size, but that gets  
8 bigger as you go.

9 So, 1,100 units would sell for between  
10 200,000 and 300,000 a year. And again, this  
11 translates back up to that less than \$49,000 of  
12 income. And 2,900 units would need to go for  
13 \$300,000 to \$400,000 per year.

14 And this is, again, accommodating net new  
15 people, assuming that, you know, if you want to  
16 get people who are getting jobs here to stay here  
17 in the District, this is kind of the housing  
18 demand. And that assumes, again, 105,000 new  
19 households in the next 10 years.

20 So I tried to do short and sweet, to the  
21 point, but I am happy to take questions, so.

22 MR. BOWERS: Any questions for -- thank

1 you, Dr. Howell. Any questions for Dr. Howell?

2 Yes, David. And again, the first time  
3 you speak, please just state your name for the  
4 folks who are keeping records.

5 MR. ROODBERG: David Roodberg. On the  
6 last chart, when you talk about beyond already  
7 planned, what's the definition of beyond already  
8 planned? Like the Task Force is planning for  
9 10,000 units by 2020. Is this above and beyond  
10 that? So what does that mean beyond --

11 MS. HOWELL: I didn't necessarily add it  
12 into what you guys are already doing. This is to  
13 house net new people. So anybody who is new  
14 that's coming in between 2012 and 2022. So a lot  
15 of I know what typically -- I know when I was  
16 here we were looking at housing people who were  
17 here and dealing with the need that was existing.  
18 So this is just new need, not --

19 MR. ROODBERG: People driven; new people  
20 driven as opposed to existing --

21 MS. HOWELL: Right. New workers.

22 MR. ROODBERG: -- demand of current

1 people.

2 MS. HOWELL: Right. New workers, is how  
3 we measured it based on the jobs that are coming.

4 MR. BOWERS: Other questions folks may  
5 have. Yes.

6 MR. EDMONDSON: Just curious, I --

7 MR. BOWERS: Can you tell us your name,  
8 first?

9 MR. EDMONDSON: I'm Jim Edmondson from E  
10 & G Group. What is the number of units that has  
11 been produced historically over, say, the last 10  
12 years per year? I mean, my understanding really  
13 is that we're going to have to reach unit  
14 production levels that are beyond our traditional  
15 capacity.

16 MS. HOWELL: Right. I mean, so I don't  
17 have an exact number for that, but what I can  
18 tell you is that all of this flurry of -- if  
19 you've seen the multifamily developments all  
20 over, this flurry of multifamily development,  
21 this is now we're just meeting the need. Just  
22 meeting the demand. And that's for, you know,

1 obviously luxury apartment buildings. So if you  
2 think about how much that is and how everyone  
3 sort of says, wow this is crazy, and the  
4 developers are all kind of -- a lot of developers  
5 that I've heard from are sort of getting a little  
6 nervous about it, that's the kind of demand  
7 that's going to have to continue because the  
8 other thing is, you know, and Mark Obrinsky from  
9 the National Multifamily Housing Coalition, he  
10 described this that you know, Baby Boomers we  
11 talked about pig and a python, right? You had  
12 this small thing, all of a sudden a huge group,  
13 and then it got smaller again.

14           Millennials are different. They're going  
15 to keep growing. And that's, you know, the  
16 population is going to keep growing and the  
17 demand for, particularly multifamily housing, but  
18 housing in general, and their demand for  
19 multifamily housing is, I think, going to squeeze  
20 the people that we're working with in terms of  
21 low income housing more than some of the other  
22 demands for housing would have been.

1           And I can try to see if I can get that  
2 information in more detail. Jeannette Chapman,  
3 who works in my office, worked on the report on  
4 housing the region's workforce, and they have a  
5 lot of that data.

6           MR. BOWERS: Other questions. Yes, sir.

7           MR. BINITIE: Good morning. This is Buwa  
8 Binitie.

9           Could you just speak a little bit to the  
10 job growth in each one of the income sectors that  
11 you produce? I know you, you know, so basically  
12 if you're looking at approximately 14,000 units  
13 over the next 10 years --

14          MS. HOWELL: Uh-huh.

15          MR. BINITIE: -- approximately how many  
16 jobs do you see being created over that same time  
17 period for the 15,000 and below and 100,000 and  
18 above?

19          MS. HOWELL: I actually didn't bring the  
20 supporting data with me on that one, but that I  
21 have very readily --

22          MR. BINITIE: Okay.

1 MS. HOWELL: -- as soon as I get back to  
2 my office. I can e-mail all this to David and  
3 get more detailed information.

4 MR. BINITIE: Okay. But do you see the  
5 job growth growing at the same pace or --

6 MS. HOWELL: It's going to slow a little  
7 bit.

8 MR. BINITIE: Okay.

9 MS. HOWELL: Because we've been -- D.C.  
10 has been growing, but and particularly in  
11 government sectors, that's going to slow.

12 MR. BINITIE: Okay.

13 MR. BOWERS: Great. Other questions? So  
14 -- did I see a question there? Okay.

15 So the high level then, we're saying in  
16 the next 10 years, 100,000 new units?

17 MS. HOWELL: Uh-huh. Hundred thousand  
18 new households.

19 MR. BOWERS: Households; 100,000 new  
20 households.

21 MS. HOWELL: Which translates to units  
22 because --

1 MR. BOWERS: Uh-huh.

2 MS. HOWELL: Right.

3 MR. BOWERS: In 10 years.

4 MS. HOWELL: And so we assumed, when we  
5 did the analysis about jobs to households, we  
6 assumed existing kind of family patterns would  
7 continue. So if you have two workers per  
8 household for X percent of the population -- so  
9 we did a lot of assumptions going -- doing our  
10 estimates.

11 MR. BOWERS: Uh-huh.

12 MS. HOWELL: So 100,000 new households is  
13 based on the number of jobs, number of people per  
14 households -- number of workers per household as  
15 it currently stands.

16 MR. BOWERS: And by the income band, do  
17 you have a sense of how many of those 100,000 new  
18 households that we'll need to accommodate in the  
19 next decade in the District, roughly how many are  
20 kind of at the below 30 or below 60 band, or  
21 below 80 band?

22 MS. HOWELL: We didn't divide it out by

1 AMI. We have the less than \$50,000 a year group,  
2 which is the one that's up there.

3 MR. BOWERS: Uh-huh.

4 MS. HOWELL: And I think that we just  
5 have to do a little -- I didn't have as much time  
6 because I wanted to dig into the analysis but we  
7 can see what we can do about --

8 MR. BOWERS: Okay. But we've had it by  
9 the income band.

10 MS. HOWELL: Yeah, we've got it by the  
11 income so it's --

12 MR. EDMONDSON: David?.

13 MR. BOWERS: Yes, Jim.

14 MR. EDMONDSON: I can remember the  
15 statistics because they were rather stark.

16 MS. HOWELL: Yes.

17 MR. EDMONDSON: Forty-five, 10, 45.  
18 That's the percentage.

19 MS. HOWELL: Yes. That's the three.  
20 Yes, he saw it. You've seen that chart then.  
21 Good.

22 MR. BOWERS: Walk us through. So that's

1 45,000 units?

2 MR. EDMONDSON: Forty-five at the top  
3 level, which I think was 75 and above.

4 MS. HOWELL: Uh-huh.

5 MR. EDMONDSON: Ten percent between 50  
6 and 75, and 45 percent below whatever the bottom  
7 is.

8 MS. HOWELL: That's where the job growth  
9 is coming from.

10 MR. EDMONDSON: Yeah.

11 MS. HOWELL: Yeah.

12 MR. BOWERS: Uh-huh. Okay. That's  
13 great. Thank you. Any other questions for Dr.  
14 Howell?

15 MR. NIDA: David.

16 MR. BOWERS: Yes.

17 MR. NIDA: Comment. I'm Tom Nida with  
18 United Bank. Couple things I've been concerned  
19 about is having feedback from underwriters in my  
20 credit department, appraisers, that are looking  
21 at all this surge of new construction saying,  
22 it's a bubble and it's likely to pop. And the

1 question here is, if we do one thing from this  
2 type of meeting, just to get this kind of  
3 information more widely dispersed to the banks,  
4 to the real estate appraisers, and others, to get  
5 a sense of the historical facts and the real  
6 well-grounded trends, because you know, we could  
7 cut it off by just cutting off the financing and  
8 thinking, you know, that next apartment is the  
9 next one that can possibly be sustained. And,  
10 you know, we're on this, you know, edge of a  
11 bubble. And it's not. It's clearly not.

12 MR. BOWERS: Right.

13 MR. NIDA: But I think it's information  
14 that needs to be more widely distributed to  
15 people that are going to have their finger on the  
16 posts of the levers of finance.

17 MR. BOWERS: And, Tom, that's a great  
18 point. And when we talked about earlier kind of  
19 what we hoped would come out of this meeting,  
20 some of them will be recommendations that this  
21 Board could consider to make to the City. But  
22 others to your point right there, there may be

1 specific things that an individual bank or say  
2 the Metro Banker's Group for example, may want to  
3 take this data and figure out ways to disseminate  
4 this to members financial institutions across the  
5 city and kind of create a forum for them to wrap  
6 their heads around the data with Dr. Howell or  
7 Dr. Fuller.

8 Buwa and then Bob Pohlman.

9 MR. BINITIE: But if we could be a little  
10 more specific, though, and delineate between the  
11 number of market rate units that are being  
12 created that is sort of creating this anxiety in  
13 the form of a bubble, and the affordable units  
14 that are also being created, because we'll see,  
15 hopefully, that there is a stark difference in  
16 the number of units that are being produced for  
17 those that can obviously afford versus those that  
18 are -- those of modest income.

19 MS. HOWELL: and that's definitely  
20 something that I looked at in my multifamily  
21 report, was that we do have a huge production.  
22 The production of zeros and ones, and -- bedroom

1 units, that are higher income; higher income  
2 requiring, higher cost. There is a huge bubble  
3 in that and developers aren't even touching the  
4 affordable units at this point. They're buying  
5 up the older ones but not building new ones.

6 MR. BOWERS: That's great. Thank you.  
7 Bob Pohlman, and then we'll move on.

8 MR. POHLMAN: Yeah, could you explain  
9 what exactly is -- these are the number of units  
10 by income band that are going to be needed?

11 MS. HOWELL: Yes.

12 MR. POHLMAN: 2012 to 2022?

13 MS. HOWELL: Yes. So to house the net  
14 new workers.

15 MR. POHLMAN: If 45 percent of the jobs  
16 are in the 75 to 99 category, is that right?  
17 Forty-five percent --

18 MS. HOWELL: I believe, yeah. That's  
19 where the --

20 MR. POHLMAN: -- in that middle and --

21 MS. HOWELL: -- growth.

22 MR. POHLMAN: -- 45 percent in the lower.

1 Why aren't the bars -- like, why aren't the bars  
2 75 to 99 equal to the bar for 49, or number of  
3 units anyway? I mean, it looks like there's  
4 maybe 16,000 units less than 49, and there's  
5 9,000 for 75 to 99.

6 MS. HOWELL: I will get more information  
7 about that, as far as what the details were on  
8 that graph because I -- that was --

9 MR. POHLMAN: Unless it's above some kind  
10 of projected supply, but it isn't.

11 MS. HOWELL: No, I don't -- no, no, it  
12 is. Actually, the Housing Regions Workforce,  
13 they did take in to account, existing supply.

14 MR. POHLMAN: Okay. So this is really  
15 number of units above --

16 MS. HOWELL: The existing --

17 MR. POHLMAN: -- some kind of projected  
18 or --

19 MS. HOWELL: Right. So it's above what's  
20 existing.

21 MR. POHLMAN: Okay.

22 MS. HOWELL: Based on production.

1 MR. POHLMAN: Above what's existing.

2 MS. HOWELL: Right.

3 MR. POHLMAN: Okay.

4 MR. BOWERS: That's good. So, as we see,  
5 we wanted to do a little bit of grounding in the  
6 notion of, as the City tries to think about our  
7 competitiveness with the job growth that's  
8 projected, right, there's clearly a need and the  
9 housing goals are laid out in the Task Force  
10 report. There will be a need that we, as a  
11 region, that we as a City, there is some serious  
12 preservation and production work that will need  
13 to happen.

14 And, Dr. Howell, if it's all right, we'll  
15 work with you to follow up, I think --

16 MS. HOWELL: Absolutely.

17 MR. BOWERS: -- to get some of the  
18 additional data that could be made available, not  
19 only to the trust fund, but to folks who are  
20 here. Obviously that will be public. And so  
21 again, if there are those who want to try to -- I  
22 know a number of folks here have seen and heard

1 on numerous occasions either Dr. Howell or Dr.  
2 Fuller present the data, pretty compelling stuff.  
3 And so if you think it could be helpful to have  
4 them come in and talk to your group, that would  
5 be great.

6 So, thank you again. So now we will  
7 transition on the agenda to the affordable  
8 housing discussion background, to the next  
9 session.

10 So for Deputy Mayor Hoskins, Andrew  
11 Trueblood is here from his office. We'll hear  
12 from him. We've asked him to speak and then  
13 Director David Berns is here, speaking on behalf  
14 of Deputy Mayor Otero to kind of set it at a kind  
15 of 30,000 foot level, some of the key goals and  
16 pillars that the City has going on; some key  
17 things that have been happening and taking place.

18 What we've asked each of them to do is  
19 take 10 to 15 minutes each, and then what we'll  
20 do is save questions for both of them together  
21 once they are done, and then after that we'll  
22 move to the facilitate discussion.

1           So, Andrew, we'll turn it over to you.  
2 Thanks for being here.

3           MR. TRUEBLOOD: Thank you, David. My  
4 name is Andrew. I'm the Deputy Chief of Staff  
5 over at DMPED and have been working closely with  
6 the Deputy Mayor on our kind of end on the  
7 affordable housing piece of our work.

8           I first must start out by apologizing the  
9 Deputy Mayor can't be here. He's actually with  
10 the Mayor in front of council, discussing the  
11 FY15 proposed budget, which as I imagine many of  
12 you know includes another \$100 million for  
13 affordable housing. A little bit over three  
14 quarters of that would go directly to the HPTF,  
15 and then there are other pieces of it including  
16 low rent supplement or Rapid Rehousing that also  
17 support a lot of the production, or support  
18 affordable housing in another way.

19           So, he is working on that and so I am  
20 here in his stead, and really just have a couple  
21 of thoughts that he wanted to pass along.

22           I think first he wanted to emphasize, you

1 know, that this 100 million is on top of a  
2 previously \$100 million commitment that was  
3 leveraged with other funds to be a total of 187  
4 million that was announced last October and  
5 November. So the dollar component of the  
6 affordable housing production and support has  
7 really been there over the last year or two.

8           And now we have been working closely with  
9 DHCD and the other housing agencies, DCHFA, DCHA,  
10 to figure out how to actually get that money out  
11 and how to actually get production. You know, it  
12 is a pig and python kind of once again, scenario,  
13 where there's a lot of money now going through  
14 both the system of government. But now as  
15 evidenced by the folks around the table, the  
16 whole affordable housing ecosystem in the City.  
17 And so the Deputy Mayor is very happy that  
18 everyone is around and we can talk about where  
19 are those pain points and how can we address them  
20 now in order to actually get this money out. And  
21 more importantly, get those units produced and  
22 filled in order to meet the Mayor's goal, the 10

1 by 20 goal.

2           And so we've been working closely on  
3 that, and we're excited that folks around the  
4 table -- and there's opportunity for the HPTF  
5 Board to weigh in and help guide some of that  
6 moving forward.

7           I think I'm interested personally -- I'll  
8 be here this morning, interested in hearing what  
9 those pain points are, both in terms of what we  
10 can do as the government, but also what can  
11 happen on the private and nonprofit side to get  
12 this done and to reach these goals.

13           I think the challenge now is to prove  
14 that we can deploy that money and do it  
15 successfully, I think. In order for success to  
16 beget success, we need to show that there can  
17 actually be production and actual attainment of  
18 these goals. I think if we get \$287 million and  
19 then it kind of sits around and projects wallow,  
20 it would be hard to ask for more money in the  
21 future.

22           So we're very interested in kind of

1 proving that the ecosystem, that the affordable  
2 housing ecosystem can produce and can step up to  
3 this challenge. And so I think that's the main  
4 gist of what the Deputy Mayor was hoping to  
5 convey this morning.

6 MR. BOWERS: That's great. Thank you,  
7 Andrew.

8 MR. TRUEBLOOD: Yes.

9 MR. BOWERS: I appreciate that. Director  
10 Berns.

11 MR. BERNS: Okay. Good morning.

12 ALL: Good morning.

13 MR. BERNS: This morning I'd like to talk  
14 mainly about a subset of our population, and  
15 that's the need for housing for our lowest income  
16 families. And by that I'm looking at and talking  
17 mainly about our TANF families and a subset of  
18 the TANF families, those that -- low income  
19 families that are presenting as homeless.

20 Now, I realize that this group is looking  
21 at a much broader view than that. But what you  
22 see in the newspaper and what really makes

1 publicity and what's the hardest and most  
2 difficult population to house are those with the  
3 lowest income, and we can build all sorts of  
4 units. Virtually as many units as you want for  
5 those that are around 49,000 or 40,000. But  
6 unless we can figure out how to house those that  
7 are receiving public assistance benefits, and  
8 remember that 40 percent of the population of  
9 Washington, D.C. is receiving some kind of  
10 assistance through the Department of Human  
11 Services.

12           And I have a few copies of my  
13 presentation. I didn't make copies for  
14 everybody, but if you want it, I'm sending it  
15 around. So I'm not sure how this thing works. I  
16 guess --

17           Here's just a brief description of our  
18 TANF caseload. In the District of Columbia, and  
19 TANF is Temporary Assistance for Needy Families.  
20 It's the old AFDC program. It's the welfare  
21 program, basically, for families. We have about  
22 17,000 of those families in the city.

1           That amounts to 44,500 children and  
2 30,544 adults.

3           UNIDENTIFIED SPEAKER: It's flipped.

4           MR. BERNS: I'm sorry. Just reverse --  
5 actually, the chart is wrong. Right. So sorry.

6           UNIDENTIFIED SPEAKER: You had it right.

7           MR. BERNS: I got it right, the chart,  
8 somebody at the last minute reversed that on me.  
9 I'm sorry.

10           The 60 month -- the number of families  
11 that have been receiving assistance for over five  
12 years is 6,000 of those. Fourteen thousand of  
13 those families are deemed eligible and have a  
14 requirement to work. The other 3,000 of those  
15 families are deemed not employable or elderly,  
16 like grandparents raising their grandchildren,  
17 and don't have a work requirement.

18           Now, of those 14,000 cases, only 1,400  
19 are reporting any income at any given time.  
20 Those would mainly be part-time jobs, low income  
21 jobs, not sufficient income to remove them from  
22 the public assistance, but receiving some kind of

1 income.

2 Now that's increasing, but it's  
3 increasing from what was even more deplorably low  
4 than that.

5 Ninety-six percent of our TANF population  
6 is African/American, even though I think just  
7 about half of the city now is African/American.  
8 Predominantly this is an African/American  
9 population, and the average TANF grant, cash  
10 grant, is \$328 per month.

11 So we're not talking about families that  
12 are closer to that, like Dr. Howell was talking  
13 about, the higher rate of 49,000. We're talking  
14 families that are receiving cash benefits, cash  
15 income of approximately \$4,000 per year.

16 And this is the population that we're  
17 primarily trying to serve. Now of those, it's  
18 not on the chart but a little over 52 percent of  
19 these families only have one child. That's good  
20 news, actually. Twenty-seven percent have two  
21 kids, 12 percent three kids, and under nine  
22 percent have four or more children.

1           Now those ones with four or more children  
2 present an even greater housing need because  
3 we're talking minimum three, probably four  
4 bedroom units for that population.

5           Just a little bit more about the TANF  
6 families. And this is a surprising one, that the  
7 head of households, one percent are 19 or  
8 younger, where it's very young. And it's good  
9 that that number isn't higher. It's only about  
10 one percent. Eleven percent are 19 to 21.  
11 Twenty-three percent, 22 to 25. Eighteen  
12 percent, 26 to 29. Thirty-one percent are 30 to  
13 39. So these are not just all very young  
14 families. There are nearly -- well over 30  
15 percent that are between 30 and 39, and another  
16 40 -- or 16 percent are 40 and older, and a lot  
17 of those again are grandparents raising their  
18 grandchildren. So this isn't just the biological  
19 parents. This would include other caretakers who  
20 have taken in the children.

21           Now, where they live, I think this is  
22 probably an interesting element for the people

1 that are actually building and financing these  
2 units. Six percent of our TANF population, of  
3 those 17,000 cases, are in Ward 1, six percent  
4 are in Ward 2, zero percent -- now, we have like  
5 such a small number, in the teens, I think number  
6 of cases in Ward 3. So it's recorded as zero  
7 percent in Ward 3. Nine percent in Ward 4, 12  
8 percent in Ward 5, 14 percent in Ward 6, 23  
9 percent in Ward 7, and 30 percent in Ward 8.

10 So the predominant population is in Ward  
11 7 and 8. Now, just as an aside, we also provide  
12 SNAP benefits, food stamps. That includes 49,000  
13 children, 72,700 adults under age 65, and then  
14 another 13,500 who are seniors. So that's just a  
15 subset so that you get a chance to see. And the  
16 average monthly food stamp benefit in addition to  
17 say those families that are receiving TANF would  
18 be another \$230 per month.

19 Now, a subset of our TANF population are  
20 the homeless families. And virtually every  
21 homeless family is eligible for either TANF cash  
22 benefits or various types of supplemental

1 services that we provide through the TANF  
2 program.

3           And of those families that have already  
4 come in and are receiving services in our  
5 homeless continuum, 35 percent are in shelter.  
6 And by shelter we're meaning D.C. General, or  
7 currently in hotels. And I'll go into a little  
8 more detail on this in some later slides.

9           About 18 percent of those families are in  
10 permanent supportive housing. Permanent  
11 supportive housing is like a permanent voucher,  
12 like a Section 8 type of a voucher that doesn't  
13 have a time limit, but it also means that they're  
14 receiving specialized services, like mental  
15 health, substance abuse, developmental  
16 disabilities, long-term kinds of issues that they  
17 need where they will always need supports, pretty  
18 much, in order to live independently.

19           We have 12 percent in transitional  
20 housing, which is apartment style housing but  
21 it's considered for a year or two, depending on  
22 the program, with the thought that they will move

1 into housing on their own, rather than through  
2 this type of a transitional basis.

3           We have six percent in apartment style  
4 shelter; very similar to traditional or  
5 transitional housing. And a new element and one  
6 that we expect and really need to grow is called  
7 Rapid Rehousing. It's a short-term voucher where  
8 the families have just recently been moved into  
9 apartments with a voucher that's only guaranteed  
10 for the first four months, but where they can  
11 keep it for a year or more if they're working  
12 diligently towards their own self-sufficiency.

13           Nationally we find that depending on the  
14 permanent vouchers, whether as low -- or local  
15 rent supplement program or Section 8, where the  
16 money has pretty much dried up, there aren't a  
17 lot of those currently new ones coming available,  
18 and we can't count on that as a financing  
19 structure for the most part for this population.

20           But most people, 80 to 90 percent of the  
21 families that we have do not need a permanent  
22 voucher. It's found that they can be successful

1 with a shorter term voucher. It's like a housing  
2 first philosophy, meaning that once you get into  
3 housing you have a lot better chance of getting a  
4 job. If you're on the streets or in a shelter,  
5 your chance of getting a job, your chance of  
6 getting your mental health, your substance abuse,  
7 and your other issues addressed, is pretty  
8 remote.

9           But if you can get into the housing  
10 first, then you have a much better chance of  
11 being self-sufficient and especially being able  
12 to take care of your educational needs, your  
13 training needs, your mental health needs, and  
14 other barriers that have been preventing you from  
15 being able to move forward.

16           Just as another point, you probably have  
17 seen in the papers, our big spike in homeless  
18 families this year. We had budgeted for and  
19 expected to have 509 new families enter the  
20 shelter system. By January of this year, three  
21 months into hypothermia season, we had already  
22 placed over 700. At that rate we were expecting

                  OLENDER REPORTING, INC.  
1100 Connecticut Avenue NW, #810, Washington, DC 20036  
Washington: 202-898-1108 • Baltimore: 410-752-3376  
Toll Free: 888-445-3376

1 to place over 1,200. We ran out of all of the  
2 hotels. You talk about construction, maybe we  
3 need to -- if we would have kept on that pace  
4 we'd be talking about how to build more hotels in  
5 order to house the homeless families, and hotels  
6 are not the solution, nor are shelters. The  
7 housing is the only solution for this massive  
8 influx and so, that's why I'm here to try to  
9 figure out ways, not just to find the housing but  
10 to support the families and to develop their  
11 skills so they can actually afford housing, maybe  
12 get up close to that 40 or \$50,000 income range,  
13 so they can afford the housing that this group is  
14 so diligently working at trying to build and  
15 provide.

16 Our intake -- let me see where I am on  
17 this. We've had -- one of the elements of our  
18 program has been to unite our TANF program and  
19 our Homeless Family Services so that families not  
20 only -- we don't concentrate exclusively on  
21 whether they need housing or whether they need  
22 welfare assistance or need a job, but moved all

1 of those services and supports into one center  
2 called our Virginia Williams Family Resource  
3 Center.

4 We served, last year, over 4,900  
5 families, almost 5,000 families. Only had to  
6 place 509 of those -- actually 460 of those  
7 families into shelter and the other 4,500 or so  
8 received other kinds of supports like emergency  
9 rental assistance, assistance with helping their  
10 friends and relatives to be able to maintain them  
11 while they looked for a job. So there have been  
12 a lot of supports for families other than jobs.

13 And to date we've served over 3,000  
14 there.

15 I'm getting the signal to move faster, so  
16 just to let you know, we have in those homeless  
17 families, a total of 3,169 people in the  
18 families. And this is from our point in time --  
19 we have another 3,700 individuals that are  
20 homeless. That hasn't been the focus of the  
21 discussion, but these are also people that will  
22 need permanent supportive housing in the long

1 run. Just in the District.

2 Here's a table that shows what the number  
3 of children living in poverty in the District  
4 would be. It's kind of a -- it tells you at the  
5 various levels, so you can look at that at your  
6 leisure.

7 Some of the issues that our families are  
8 experiencing, and this important information so  
9 that -- and it's from an assessment -- before  
10 this administration came, before the Mayor came  
11 in, we weren't doing an assessment on our TANF  
12 population. So we didn't know how many had  
13 various kinds of issues. We now have done 100  
14 percent assessments of all of the families, done  
15 screening. And 14 percent of those have been  
16 screened as having -- or likely in need of mental  
17 health treatment, eight percent for substance  
18 abuse problems. Which, yeah it's a myth that  
19 welfare recipients are a bunch of druggies and  
20 alcoholics and all, certainly there is a subset  
21 of that population, but not a lot heavier  
22 concentration than the population in general.

OLENDER REPORTING, INC.

1100 Connecticut Avenue NW, #810, Washington, DC 20036

Washington: 202-898-1108 • Baltimore: 410-752-3376

Toll Free: 888-445-3376

1           Seventy-five percent have at least  
2 attained some high school, or graduated from high  
3 school or more. But that means that 25 percent  
4 don't even have a high school education. Nine  
5 percent reporting issues of domestic violence,  
6 and 19 percent of our TANF population are now  
7 indicating significant housing instability. It  
8 was 40 percent just two years ago, and now we're  
9 seeing that that is improving. I think mainly  
10 through our efforts at Virginia Williams. So  
11 that's one of the positives and I'll spend more  
12 time with you on that later.

13           So, just in closing, we know that this is  
14 the production side, but in order to understand  
15 the population and the true needs, we have to  
16 continue to focus in on their employability,  
17 their training, because it's not just how many  
18 affordable units there are, it's how many of our  
19 residents can afford those units. And you're not  
20 going to be able to afford them at \$4,000 a year  
21 in income, no matter again, what you build.

22           A couple of highlights that I'd like to

                  OLENDER REPORTING, INC.  
1100 Connecticut Avenue NW, #810, Washington, DC 20036  
Washington: 202-898-1108 • Baltimore: 410-752-3376  
Toll Free: 888-445-3376

1 spend more time on. We have a campaign coming  
2 called, 500 families, 100 days. Many, if not all  
3 of the producers have been invited to a meeting  
4 coming up on April 17th at 99 -- or at 9:00 a.m.,  
5 April 17th, at 33 N Street. And this is to  
6 discuss how we're going to use Rapid Rehousing  
7 and other techniques to find 500 existing units  
8 for the families that are currently in the hotels  
9 and in the shelter in the next hundred days, and  
10 to use that Rapid Rehousing to get them out so  
11 that they have a much better chance of when  
12 they're in stable living environments to get a  
13 job and overcome their other barriers.

14           And one new thing that the Mayor just  
15 introduced and that we're very rapidly putting  
16 into place is called, One Congregation/One  
17 Family. And that's to take our many hundreds of  
18 faith communities, whether it's Synagogue,  
19 churches, Masques, or whatever and have those  
20 faiths, resources, recruit teams from their  
21 congregation to four to six families that will  
22 wrap around each of our homeless families and

1 provide an extended family, providing hope,  
2 security. Government can do just so much. It's  
3 not always just a matter of the resources and the  
4 finances, but mainly getting a loving supportive  
5 helpful community around them so that they have  
6 the hope and the ability and supports necessary  
7 to be successful in the long run.

8           So that in a snapshot is who we are  
9 trying to serve, and just a few of the ideas that  
10 we see blending in with the whole production  
11 side, in order to meet this very vital need.  
12 Thank you.

13           MR. BOWERS: Great. Thank you, Director  
14 Berns. We appreciate that. We've got time for  
15 about three questions or so, for either Andrew or  
16 Director Berns. Any questions that anyone has?

17           MS. GARR: David. Muriel Garr with  
18 SunTrust for Director Berns.

19           On the slide that you have on where the  
20 TANF families live, is there a breakout,  
21 especially in Wards 6, 7, and 8? Are these  
22 individuals living in shelters, or what

1 percentage of these individuals are living in  
2 shelters or receiving some type of voucher?

3 MR. BERNS: I don't have the voucher  
4 information. The vast majority are living in --  
5 some of them are in public housing, and Adrian  
6 can speak to that. But a lot of them are doubled  
7 up with other family members. Many of them have,  
8 you know, stabilized and living maybe with  
9 another family or -- very few of them are  
10 supporting, you know, actual grants. So it's  
11 through the meager resources they get through  
12 TANF.

13 MR. BOWERS: Other questions for Andrew  
14 or Director, from folks around the table? Any  
15 other questions that we have? Yes.

16 MS. KRESKY-WOLFF: Marilyn Kresky-Wolff,  
17 Open Arms Housing.

18 If 30 percent have -- families have  
19 mental health substance abuse and domestic  
20 violence, why do only 80 to 90 percent need an  
21 ongoing permanent voucher?

22 MR. BERNS: Why are --

1 MS. KRESKY-WOLFF: So in other words, if  
2 you add up almost 30 percent have serious, you  
3 know, serious --

4 MR. BERNS: Right.

5 MS. KRESKY-WOLFF: -- mental health  
6 issues, but yet only 80 to 90 percent need a  
7 permanent voucher under the Rapid Rehousing --

8 MR. BERNS: Only --

9 MS. KRESKY-WOLFF: -- statistics --

10 MR. BERNS: We're finding, using various  
11 scoring instruments, one called the SPDAT and  
12 one, the -- wow. Anyway, looking at the most  
13 crucial needs that only seven percent are scoring  
14 as needing permanent supportive housing and some  
15 of these numbers, they're not mutually exclusive.  
16 So some of them with mental health problems may  
17 also be victims of domestic violence or whatever.

18 And we're not talking about the severity.  
19 There's many people with a rather mild -- you  
20 know, I wouldn't say mild, but depression or  
21 something that can be treated and won't  
22 necessarily be a life threatening or everlasting

1 kind of an issue. So based on the scoring  
2 techniques we're finding that most people, once  
3 they're stabilized can address these other  
4 issues, get better, get more support, and be  
5 successful with something less than a permanent  
6 voucher.

7 MR. BOWERS: That's great. Yes, and  
8 we'll take the last question. This is actually  
9 from Tom.

10 MR. NIDA; we heard from Dr. Howell about  
11 trend, looking ahead to the next 10 years. Do  
12 you have trends of what you're facing with this  
13 population, looking 10 years ahead if nothing  
14 else changes?

15 MR. BERNS: Well, one thing has changed  
16 and that's that the District never had a time  
17 limit on their welfare benefits. Now there is a  
18 time limit.

19 Now the idea behind that isn't to punish  
20 people or to cut their benefits off, but rather  
21 to give a sense of urgency that you'll never be  
22 able to make it on \$4,000 a year; that that is

1 very much just a temporary band aid and your only  
2 real chance of success is to get a job and to --  
3 and so there's been a huge increase in resources  
4 to help people with employment training and  
5 overcoming their other barriers.

6           So we're expecting that the actual number  
7 of families on TANF will go down, not because  
8 they're just cut off by the time limits but  
9 because we're putting more resources out for  
10 helping them to be successful. But in order to  
11 be successful they have to be in a stable housing  
12 environment first because we have found that they  
13 just can't get a job, as I said before, when  
14 they're living in shelter or doubled up, or so  
15 insecure in their housing situation that all of  
16 their time and energy goes into just having a  
17 safe place to sleep each night.

18           MR. BOWERS: I'm going to ask Director  
19 Charles Thornton is here, to say the last word  
20 for this section, then we're going to turn it  
21 over to Marisa. Director Thornton.

22           MR. THORNTON: Thank you. Charles

1 Thornton, Office of Returning Citizen Affairs.  
2 And I just wanted to piggyback on some things  
3 Dave was talking about. And there is an  
4 additional subset that is extremely homeless, and  
5 I'm talking about many of you may have heard  
6 people referencing returning citizens.

7           What they're talking about is men and  
8 women returning from incarceration. And right  
9 now there is about 8,000 people that return to  
10 the city annually from incarceration, and it can  
11 create a huge public safety concern. There's  
12 another 16,000 men and women on supervision in  
13 the District right now that, you know, are  
14 literally, you know, returning to homelessness.

15           You know, a lot of men and women wind up  
16 in, you know, basements or on floors. But the  
17 public safety concern as we continue to grow as a  
18 city and not having very little, if any supports  
19 for this population, any housing, any reentry  
20 housing, that sort of supports is something that  
21 is definitely, we're going to really have to  
22 begin to look at because again, the public safety

1 concern in this is just really off the charts.  
2 When you're talking about 16,000 men and women  
3 without a home return in, and under supervision,  
4 and they face all the same, you know, barriers  
5 that David talked about in terms of employment,  
6 training, being unemployable. You know, it  
7 really, you know, speaks to why the recidivism  
8 rate is about 50 percent. These people commit  
9 crimes and go right back to work -- right back to  
10 jail. So that's something I wanted to point out  
11 also.

12 MR. BOWERS: Thank you, Director  
13 Thornton. Appreciate that.

14 I want to thank Director Berns and Andrew  
15 for coming through, and obviously you're all  
16 welcome to stay, as well as Dr. Howell, for their  
17 presentations.

18 Very quickly as I get ready to turn over  
19 to Marisa Flowers, for some of you all who may  
20 have joined us after we began this conversation,  
21 we're going to power through, actually, until  
22 about a quarter of noon and then take a break.

OLENDER REPORTING, INC.  
1100 Connecticut Avenue NW, #810, Washington, DC 20036  
Washington: 202-898-1108 • Baltimore: 410-752-3376  
Toll Free: 888-445-3376

1 Facilities are right outside the door. Help  
2 yourself also to refreshments in the back. We're  
3 going to try and be succinct in comments and  
4 makes sure we capture as much from folks who are  
5 around the table in the time.

6           So now let me turn it over. I want to  
7 thank Marisa Flowers from Green Door Advisors,  
8 who is going to be our facilitator for the day,  
9 and want to thank her for all the work that she's  
10 put in, in terms of getting us along working with  
11 others, prepared for this day. And also again,  
12 thanks again for the folks who are going to be  
13 capturing what you say.

14           Please make sure when you speak, again,  
15 speak loudly. We want to make sure as folks are  
16 trying to now really capture what will be said by  
17 folks from different sectors that they can  
18 capture that information as we go.

19           So, Marisa, I'll turn it over to you.

20           MS. FLOWERS: Great. Good morning,  
21 everybody.

22           ALL: Good morning.

1 MS. FLOWERS: So, as David mentioned,  
2 this morning is going to be broken up into a  
3 couple of sections. Right now we're going to  
4 focus on three things. We're going to be  
5 focusing on variance for affordable housing  
6 development, current resources, and what is  
7 needed to increase capacity.

8 We'll then take a short break. We're  
9 going to work together to bring together the  
10 salient points, come back to you and say, okay,  
11 you've told us some of the barriers, how to  
12 address those barriers. Now let's, as David  
13 said, focus on some specific actions that will  
14 help to move the ball forward in terms of  
15 productivity.

16 A couple ground rules. I think everybody  
17 in here -- not everybody, but a good number of  
18 you know each other, which is wonderful. People  
19 should feel comfortable here in speaking. But as  
20 David said, this is a working meeting. You all  
21 are the ones here to work. So we want to get  
22 your great ideas out, do that in a manner that is

1 efficient and respectful.

2 Any questions before we get started?

3 (No audible response.)

4 MS. FLOWERS: Great. All right. To give  
5 us a jumpstart on this morning because this is a  
6 conversation that many of you have on a daily  
7 basis, on a weekly basis, and a number of your  
8 groups and organizations, we sent out a brief  
9 survey and appreciate the folks who had the  
10 opportunity to respond. But we're going to be  
11 going over those again for those folks who did  
12 not have an opportunity to provide their input  
13 via the survey, but it will provide us with a  
14 little bit of a jumpstart this morning.

15 So the first thing that we asked in the  
16 survey was about barriers. And we sent surveys  
17 out to the developers, to the financial  
18 institutions, as well as philanthropic.

19 People have sat around tables in meetings  
20 for a long time discussing some of these issues.  
21 And so these are the barriers that we actually  
22 put out to the group; barriers that we think are

1 known and we don't sort of need to rehash and  
2 beat a dead horse about.

3           Predictability of subsidies, gap  
4 financing for the very deep levels of  
5 affordability, organization capacity for those  
6 who are actually doing the development, slow  
7 and/or inefficient bureaucratic process,  
8 affordability covenants, the risk profile for  
9 local and federal subsidies, particularly for the  
10 financial institutions, appraisals. I think Tom  
11 already began for that conversation. Bridge  
12 financing tools, mezzanine financing, the  
13 availability of that, loan to value issues that  
14 we've heard.

15           So this was put out to folks saying, we  
16 understand this. We know that these issues are  
17 concerns and barriers to development.

18           What we've heard back so far, from the  
19 philanthropic community, knowing where to invest  
20 for the maximum impact given limited resources,  
21 high transaction costs from the financial  
22 institutions, financial capacity of the sponsor,

1 good property management on the back end, a  
2 variety of underwriting constraints, replacement  
3 reserves, adequate debt service coverage, funding  
4 and the coordination of funding for supportive  
5 services, competitiveness given market  
6 conditions, high acquisition costs given the  
7 overall real estate market in the city, the need  
8 for timing and process inefficiencies, slow  
9 paying of equity and deferment of development  
10 fees, and credit enhancement requirements.

11           So here are the things that we've heard,  
12 here are the things that we've got, we've got in  
13 our notes and we know that these are some of the  
14 barriers to address. What is missing from this  
15 list?

16           Yes. And if you can say your name before  
17 you speak?

18           MR. ROTHMAN: Yes, George Rothman with  
19 Manna.

20           Funding requirements not matching  
21 changing compliance issues such as energy  
22 standards, green building requirements, et

1 cetera.

2 MS. FLOWERS: Okay. So changing and  
3 funding requirements, energy standards and green  
4 buildings. Anybody else? David.

5 MR. ROODBERG: Community pushback, and  
6 you know, certain neighborhoods feel where it's  
7 more affordable to do the affordable housing, but  
8 they already have too much, so don't do it here.  
9 You know, do it elsewhere.

10 MS. FLOWERS: Right.

11 MR. ROODBERG: Where again, you have a  
12 much higher cost to do it.

13 MS. FLOWERS: Right. Additional barriers  
14 folks are facing out there? Yes.

15 MS. DONALDSON: Polly Donaldson. I think  
16 that at times there's a disconnect between public  
17 policy in one that's creating priorities and  
18 identifying needs as we just heard, and directly  
19 and intentionally saying, and these are the kinds  
20 of developments we need to address those needs.  
21 It's somewhat left to the market, but the market  
22 of both for profit and not for profit developers

OLENDER REPORTING, INC.

1100 Connecticut Avenue NW, #810, Washington, DC 20036

Washington: 202-898-1108 • Baltimore: 410-752-3376

Toll Free: 888-445-3376

1 to figure it out; to find the right property  
2 versus an even more intentional linking,  
3 particularly of government resources because they  
4 leverage so much in that way.

5 MS. FLOWERS: So aligning those  
6 priorities with the resources?

7 MS. DONALDSON: Well, aligning it even  
8 more intentionally than it's done now. I'm not  
9 saying it isn't done now, but even more so to  
10 really just maximize effort and take a little bit  
11 of even more of the uncertainty out of it.

12 MS. FLOWERS: Okay. Yes.

13 MR. ROTHMAN: Large public dispositions  
14 with insufficient ADU requirements.

15 MS. FLOWERS: Okay. Did you have a  
16 question. No? Any other barriers? Yes.

17 MR. DICKSON: Bryan Dickson from City  
18 Community Capital.

19 High transactions cost, which is  
20 mentioned, and high cost to build create a gap  
21 in the capital stack that we all need to remain  
22 keenly focused on filling. So, putting those

1 sources of funds together to meet the uses of  
2 funds is a constant struggle.

3 MS. FLOWERS: Yes.

4 MR. POHLMAN: Bob Pohlman. High  
5 transaction costs for low income housing tax  
6 credits.

7 MS. FLOWERS: Okay. Anything else?  
8 Adrienne.

9 MS. TODMAN: I have a barrier. The time  
10 it takes me to get stuff through HUD.

11 (Laughter.)

12 MS. TODMAN: Which then slows down many  
13 of you.

14 MR. BOWERS: Are they here? Where is  
15 HUD?

16 MS. FLOWERS: Oh.

17 MR. KELLEY: I think it might be worded  
18 differently. It's just that we have so many  
19 different programs with so many different  
20 requirements that have different timelines and  
21 terms --

22 MS. FLOWERS: Uh-huh.

1 MR. KELLEY: -- and the connectivity  
2 between those things. And the Federal Government  
3 is like the worst kind of quality with those  
4 types of rules; don't necessarily synch with  
5 local rules.

6 MS. FLOWERS: Okay. So we've got layers.  
7 We've got some -- what's happening in the local  
8 level then moving up to the federal level; both  
9 of those not necessarily diving and slowing down  
10 the overall process, both on the government side  
11 and then translating over to the developers.

12 Jim?

13 MR. EDMONDSON: The District's resources  
14 for gap financing are the best in the Washington  
15 Metropolitan area. There's no question about  
16 that. And yet the gap financing required for any  
17 type of development, major rehabilitation or new  
18 construction is larger than we'd all like per  
19 unit. And I've looked briefly at the NOFA that  
20 just came out. The recommended limit -- not  
21 limit, but guideline, is unfortunately rip and  
22 (Indiscernible)and we just need to recognize the

1 realities of what the capital stack has to look  
2 like in order to make things happen.

3 MS. FLOWERS: Okay. Okay. So what's  
4 coming out on the public sector side doesn't  
5 necessarily match market conditions.

6 MR. EDMONDSON: Yes. And it's better  
7 than any place else, but still difficult.

8 MS. FLOWERS: Okay. Buwa?

9 MR. BINITIE: I think the same -- to  
10 second what Jim said, I think the same  
11 restrictions apply to whether or not you want to  
12 produce homeownership housing with using the  
13 current HPTO guidelines.

14 So the current HPTO guidelines suggest  
15 that 40 percent of the units have to be at 30  
16 percent of AMI. And in reality do we want to be  
17 producing homeownership units for folks at that  
18 AMI level?

19 MS. FLOWERS: Okay. Yes?

20 MR. KELLEY: The drying of philanthropic  
21 dollars that are critically needed for  
22 predevelopment costs.

1 MS. FLOWERS: Okay. Any other barriers,  
2 folks, that are not on the screen or haven't been  
3 said by one of your colleagues?

4 (No audible response.)

5 MS. FLOWERS: Great. We were hoping this  
6 would be sort of the quickest part of the  
7 conversation, again because you all live with  
8 this every day, you know the barriers I think, to  
9 a certain degree folks agree on the barriers.

10 Is there anything that isn't on the board  
11 or has been said that anybody would disagree with  
12 and say, you know, I don't see that as a barrier.  
13 We've already addressed that issue?

14 (No audible response.)

15 MS. FLOWERS: Okay. Great. So let's  
16 talk about these resources.

17 So, I think to your point, Mike,  
18 philanthropic, we sent the information out, the  
19 surveys to philanthropic instate and to  
20 developers and to the financial institutions  
21 philanthropy side what we heard and would love to  
22 hear from the couple folks in the room today,

1 something different that primarily the support is  
2 for operating support as opposed to actual deals,  
3 and what does exist is relatively minor, is what  
4 we've heard.

5           So we'd love to hear, and this is a  
6 little bit for anybody who watches ESPN around  
7 the horn -- I have a husband so, I regularly  
8 watch it. But do you have -- does that jive with  
9 what you guys are providing on the philanthropic  
10 side? Can you give a sense to the group on what  
11 you provide on an annual basis to support  
12 affordable housing?

13           MS. GREINER-LOTT: Well, my name is  
14 Gretchen Greiner-Lott and I'm representing --

15           MS. FLOWERS: Can you speak up?

16           MS. GREINER-LOTT: I'm sorry. I'm having  
17 a lozenge right now.

18           MS. FLOWERS: Okay. You can stand up.

19           MS. GREINER-LOTT: My name is Gretchen  
20 Greiner-Lott, I'm here representing the  
21 Washington Regional Association of Grant Makers.  
22 And as such I can tell you information about what

1 our grant makers or members have told us about  
2 their giving, and this totally jives with what  
3 they've told us.

4           And I think that amounts of money they  
5 have for affordable housing are small, and I feel  
6 like a lot of times they think it's not going to  
7 make that much of a difference. It's a drop in  
8 the bucket considering the financial deals and  
9 the money that's needed for those financial  
10 deals. And a lot of times they do want to  
11 provide operating support for folks so that they  
12 can do the other work they need to do to get the  
13 financial support they need.

14           UNIDENTIFIED SPEAKER: Speak up. I can't  
15 hear.

16           UNIDENTIFIED SPEAKER: She can't speak  
17 up.

18           MS. FLOWERS: Okay. I can repeat. So,  
19 what she was saying was that the organizations  
20 that are members of the -- I'm sorry. The grant  
21 makers -- hold on. Washington Area Grant Makers  
22 Association have relatively limited funds that

1 they feel as if those funds are just a drop in  
2 the bucket, won't really have a big impact on the  
3 issues of affordable housing, and that the  
4 limited funds that are provided generally go to  
5 operating support as opposed to going  
6 specifically into deals.

7 Yes, please.

8 MS. FREEMAN: I'm Terri Freeman and I'm  
9 with the Community Foundation and in addition to  
10 our unrestricted grant making we represent a lot  
11 of individual family donors who typically don't  
12 give large size grants. So the funding just  
13 really is not there.

14 I think people have to understand the  
15 relative size of our funding community is  
16 miniscule in comparison to Chicago and New York  
17 and Philadelphia. We don't have the base in  
18 private foundations, institutions that have been  
19 around for a long time. We don't have national  
20 foundations with the exception of maybe one or  
21 two, in our region. So you're looking at  
22 families, for the most part, that are supporting

1 this work. And their investments have  
2 predominantly been in the arena of supportive  
3 services.

4 I guess one thing that I would throw out  
5 there is that I do believe that funders want to  
6 help. But they've got to know where they should  
7 be helping. And it can't be spread all over the  
8 place. We don't have the level of capital to  
9 necessarily invest in the development piece of  
10 the pie.

11 But there are those that are looking at  
12 PRIs as potential use for funding. I think there  
13 needs to be a coordinated response to supporting  
14 this arena. The data that we've heard this  
15 morning is stunning. And I don't think the  
16 philanthropy community is going to grow that  
17 much, frankly. So I think we're going to have to  
18 figure out what's the piece that should be  
19 focused on by philanthropy.

20 And I think with RAD's support, the  
21 philanthropy community is willing to listen and  
22 come to the table, I think, in some collective

1 manner to say, okay, this is where you're saying  
2 you need our help, this is where we'll help. But  
3 it's not going to be able to be spread all  
4 around.

5 MS. FLOWERS: Great. Next we heard back  
6 from some of the financial institutions and would  
7 love to hear from the folks in the room today.  
8 We asked what type, what products you provide,  
9 both for development as well as for operating  
10 support.

11 Now the range was really wide from  
12 smaller community banks that are doing just a few  
13 million dollars a year to national and  
14 international banks that are doing over \$100  
15 million a year. So wide range in responses.

16 We'll look at development first. You  
17 know, everybody is providing financing for  
18 construction and permanent financing, that's sort  
19 of the most straightforward, the easiest to do.  
20 Eighty percent acquisition. Mezzanine and  
21 predevelopment financing, from what we heard, and  
22 this is just from the folks who responded, 40

1 percent equity in the form of tax credits, 40  
2 percent, and then grants, 20 percent.

3           So we'd love to hear from the folks in  
4 the room. The product that you're providing,  
5 again, what products are you providing for those  
6 that are a little bit more challenging,  
7 mezzanine, predevelopment. What enables you to  
8 provide those resources to a specific project,  
9 because we hear a lot of times that those are the  
10 barriers. When are you able to do it?

11           So if we could just maybe -- Tom, if you  
12 want to start?

13           MR. NIDA: Sure. I think in our case we  
14 typically stick to fairly conventional types of  
15 financing structures, the construction firm  
16 acquisition, occasionally some predevelopment.

17           What we've tried to take a fairly liberal  
18 approach about is what we would consider to be  
19 equity, which sometimes is just soft subordinate  
20 debt, or tax credits, or whatever, so that we  
21 could pass the regulatory barriers, because in  
22 this age of Dodd-Frank and Basel III, and things

1 all us bankers are having to deal with, that it's  
2 getting tougher to do regular mortgage lending.  
3 I mean, that's the price we pay for the bubble we  
4 went through in '08 and '09.

5 MS. FLOWERS: And, Tom, can you speak up  
6 just a little bit?

7 MR. NIDA: Sure. And so, you know, we  
8 are trying to be creative with what we consider  
9 to be eligible to be the equity piece.

10 MS. FLOWERS: Okay.

11 MR. NIDA: And whether it's true equity  
12 or it's, you know, some sort of soft subordinate  
13 financing, you know, if it doesn't have a hard  
14 number for repayment that we have to work into  
15 our debt service coverage capacity issues, then  
16 we'll give it liberal interpretation as equity,  
17 or quasi equity to get it done, but the rest of  
18 our capital structure is fairly conventional.

19 MR. PERRUS: Hi. Chi Perrus, City First  
20 Bank. Similar to United Bank, I mean, we provide  
21 traditional financing for construction perm  
22 acquisition, debt as well. We're federally

1 regulated but our grandparent company, City First  
2 Enterprise, which is a nonprofit organization,  
3 does provide mezzanine and in some cases  
4 predevelopment funding.

5 Part of the reason that they have the  
6 ability to do so is that they're not federally  
7 regulated and their funding sources are different  
8 from ours. But as far as the bank side, we  
9 provide pretty traditional type of financing. I  
10 would say that one difference between us as a  
11 CDFI bank and maybe some other financial  
12 institutions is that our mission focus is  
13 affordable housing, so we seem to be a little  
14 more creative and maybe a little less restrictive  
15 as it relates to our underwriting standards.

16 MS. FLOWERS: Can you talk about -- so  
17 when you say creative, just for folks in the  
18 room, what does that mean to you?

19 MR. PERRUS: Well, we may be a little  
20 more relaxed as it relates to our maximum loan to  
21 value or loan to cost, and our debt service  
22 coverage ratios.

1 MS. FLOWERS: Okay.

2 MS. GARR: Hi. Muriel Garr with  
3 SunTrust. We provide all of these, however one  
4 of our challenges is that we really do work --

5 MS. FLOWERS: And if you could speak up.  
6 I'm sorry.

7 MS. GARR: We really do look to work with  
8 what we consider tier one or seasoned developers.

9 MS. FLOWERS: Okay.

10 MS. GARR: And that pool is limited.

11 MS. FLOWERS: Okay.

12 MS. GARR: Based on how we come up with  
13 that determination.

14 MS. FLOWERS: And who do you come up with  
15 that determination?

16 (Laughter.)

17 MS. FLOWERS: Maybe a highlight.

18 MS. GARR: I'll pass on that.

19 MS. FLOWERS: Okay.

20 MR. WASHINGTON: Why is that a hard  
21 question?

22 MS. GARR: It's not a hard question.

1 MR. WASHINGTON: Okay. I'm just  
2 wondering. Is there like this many years in the  
3 business, this much net worth? I'm just curious.

4 MS. GARR: Years in the business, net  
5 worth, experience that the company has had with  
6 working with those particular developers, their  
7 ability to deliver on time.

8 MR. WASHINGTON: But like, can you put  
9 metrics on those, you know? Ten years in  
10 business, five years, 10 builds. I always find  
11 banks such black boxes, you know, as a developer.  
12 You know, and it was like, this deal is good,  
13 this deal is not like -- you know, can you know  
14 ahead of time. So, I'm always curious about  
15 that.

16 MS. FLOWERS: So, and just so our folks  
17 up here. So Adrienne was asking about sort of  
18 getting to the specifics of what is a seasoned  
19 developer and it's based on experience, capacity,  
20 and previous relationship with the bank among  
21 other factors. Bryan.

22 MR. DICKSON: So I'm Bryan Dickson from

OLENDER REPORTING, INC.  
1100 Connecticut Avenue NW, #810, Washington, DC 20036  
Washington: 202-898-1108 • Baltimore: 410-752-3376  
Toll Free: 888-445-3376

1 City Community Capital. We're fortunate as a  
2 large financial institution to have lots of  
3 capability at City. We provide construction  
4 permanent financing, short-term acquisition  
5 financing, predevelopment loans, equity.

6 We've done something interesting, I  
7 think, in the equity space over the past year,  
8 year and a half. We were traditionally an  
9 investor in low income housing tax credit equity.  
10 Our needs have changed, and as a result we  
11 created some taxable equity funds to be able to  
12 invest in projects which are shorter term  
13 investments that typically have a horizon of  
14 seven years as opposed to the longer traditional  
15 LIHTC equity investment.

16 And that has been met with a lot of  
17 fanfare and a lot of interest where we're able to  
18 actually invest equity in an affordable housing  
19 property that is short-term, to focus on  
20 preservation. Maybe for the purpose of  
21 acquisition. There's a great need in our  
22 business to facilitate -- I was talking about a

1 gap in the capital stack before, and this is an  
2 attempt really to address that gap in the capital  
3 stack, also while balancing our need to get CRA  
4 credit in our market here in Washington, D.C.

5           And I think it works really well. It  
6 facilitates an acquisition. We can make a short-  
7 term acquisition loan in conjunction with an  
8 investment of equity. An affordable housing  
9 developer can acquire a property with a longer  
10 term view in terms of maybe taking down that  
11 property but then recapitalizing, rehabilitating  
12 that property in the future with some more  
13 traditional sources of funds.

14           You know, one barrier that we didn't  
15 spend a lot of time talking about is timeliness,  
16 and what this does is this helps address that  
17 timeliness factor. So we've been focused on  
18 that.

19           MS. FLOWERS: And you have been able to  
20 deploy that product in the city?

21           MR. DICKSON: Yes. In this market.  
22 Yeah.

1 MS. FLOWERS: That didn't --

2 MR. BOWERS: Just one housekeeping note.  
3 There are a couple of folks I see in the room who  
4 were specifically invited to attend and we may  
5 have run out of room at the table, but if you're  
6 here -- I see one of our foundation partners, a  
7 couple lending partners. So if you got a  
8 specific invitation to attend, if you can slide  
9 your table, or feel free to chime in from where  
10 you are because again I want to make sure that  
11 the breadth of folks we invited to come and  
12 participate can make sure to be heard, so.

13 MS. FLOWERS: Great.

14 MS. GARCIA: Hi, I'm Melissa Garcia from  
15 the Low Income Investment Fund. We're a national  
16 CDFI. We provide many of these products here,  
17 construction, perm, acquisition. We do a very  
18 limited amount of predevelopment for partners who  
19 we know well.

20 We have been able to put out a product  
21 here in the market to -- what Muriel was calling  
22 sort of the top-tier developers, for preservation

OLENDER REPORTING, INC.  
1100 Connecticut Avenue NW, #810, Washington, DC 20036  
Washington: 202-898-1108 • Baltimore: 410-752-3376  
Toll Free: 888-445-3376

1 acquisition financing, much like Bryan was  
2 talking about. It's an acquisition line of  
3 credit. We can turn it around very quickly for  
4 developers who are trying to compete with some of  
5 the more cash-rich developers trying to pick up  
6 properties that are at risk of going market rate  
7 and we've been able to deploy all of our funds  
8 that we have available successfully into the  
9 Greater D.C. Metro area.

10           The line, we're able to go up to 100  
11 percent TLV so it can be used a little bit like  
12 equity, and the term is longer, like Bryan was  
13 saying. We can go out to about five years, with  
14 exception, a little bit longer to give developers  
15 some time to reposition the property and to find  
16 longer term financing to secure those properties  
17 as affordable for the future.

18           MS. FLOWERS: Craig, do you want to chime  
19 in?

20           (Laughter.)

21           MR. PASCAL: In general, you know, I go  
22 back to when I joined the bank 16 years ago and

1 the president took me aside and said, banking is  
2 not rocket science. So I think it's relatively  
3 simple. I think in the dynamic post 2008 there  
4 is an issue. It used to be you sort of both  
5 underwrote the transaction and the sponsor with -  
6 - you focused more on the transaction first and  
7 then the sponsor second. Post 2008 it's more the  
8 sponsor first and the transaction second because  
9 a lot of us ended up with transactions that we  
10 had to address down the road.

11 So I think, you know, issues of like --  
12 there's no question there's, you know, capacity  
13 issues and if you wanted to expand the pie of  
14 people that are doing -- and there's so many.  
15 Washington is lucky to have so many great  
16 developers.

17 But I think, you know, additional focus  
18 is on some credit enhancements, things like that,  
19 could open the pie a little bit wider than the  
20 current environment. So that's just one.

21 And there are existing developers that  
22 probably could increase the number of

1 transactions they do. So a combination of, you  
2 know, a little bit more to shore up the people  
3 with less capacity and then just more  
4 transactions to the existing capable developers  
5 could help increase production.

6 MS. FLOWERS: And in terms of the  
7 products that the Agency provides.

8 MR. PASCAL: You know --

9 MS. FLOWERS: Again.

10 MR. PASCAL: -- we're a bank. Yeah.

11 MS. FLOWERS: Yeah. Okay.

12 MR. PASCAL: It's pretty simple.

13 MS. FLOWERS: All right. Sue. I'm  
14 sorry.

15 MS. MARSHALL: Actually, we're not a  
16 financial institution, we're nonprofit  
17 intermediary.

18 MS. FLOWERS: Uh-huh.

19 MS. MARSHALL: We use funding from both  
20 HUD and DHS, Human Services, and it is mostly for  
21 services in projects.

22 MS. FLOWERS: Right. Okay. And can you

1 talk a little bit about how that money -- because  
2 I think, and please correct me if I'm wrong,  
3 probably one of the few in the room that does  
4 provide funding for those supportive services  
5 which are so critical for affordable housing. So  
6 can you talk a little bit about how those  
7 resources are deployed?

8 MS. MARSHALL: Most of them are deployed  
9 through a competitive RFP process. It's  
10 performance based so we are in the third year of  
11 an agreement. We also partner with the  
12 Department of Human Services on the Rapid  
13 Rehousing and we're participating in the 500  
14 homes in 100 days, so we are the conduit for most  
15 of the Rapid Rehousing funding that comes in the  
16 District.

17 MS. FLOWERS: Are there folks from  
18 financial institutions who have not yet had an  
19 opportunity to chime in?

20 Yes.

21 MS. LIEBERMANN: Hi, I'm Nancy Liebermann  
22 and I run Cornerstone. We're a special needs

1 housing financing remediary. You'll see --

2 MS. FLOWERS: Nancy, if you could stand  
3 and just project a little bit? Thank you.

4 MS. LIEBERMANN: Okay. Cornerstone is  
5 a special needs housing financing remediary. Our  
6 funds primarily have come from the Department of  
7 Behavioral Health and DHCD. We focus not only on  
8 acquisition but also on preservation. And we  
9 tend to be on the kind of the a smaller end where  
10 you shouldn't have to go to DHCD, but if you need  
11 20 to \$50,000, that sort of grant, we have funds  
12 available.

13 We are also a SAFI lender and we're the  
14 lowest rate SAFI lender out there, so, you know,  
15 people should be aware of that. And so our money  
16 does recycle. We do grants and we do loans.

17 And there has been some recent interest  
18 in investing more in Cornerstone on the private  
19 sector side. We just received a PRI. We'd love  
20 to get more PRIs, so we'd love to talk, you know,  
21 to the funders around the room. Thank you.

22 MR. BOWERS: What was your name again?

OLENDER REPORTING, INC.  
1100 Connecticut Avenue NW, #810, Washington, DC 20036  
Washington: 202-898-1108 • Baltimore: 410-752-3376  
Toll Free: 888-445-3376

1 MS. LIEBERMANN: Nancy Liebermann.

2 MR. BOWERS: Nancy Liebermann.

3 MR. BANKS: I'm Jeffrey Banks, Bank of  
4 Georgetown. We do community bank, traditional  
5 finance and deals under 10 million would be great  
6 for us. Ideal client would be neighborhood  
7 development corporation.

8 Adrienne, are you there? Yes. Okay.

9 Or, you know, people who have experience  
10 out there in the arena, have done multiple deals.

11 MS. FLOWERS: Great. Yes.

12 MR. ROTHMAN: Yes, I have a question  
13 because listening to the banks, our experience is  
14 over the past several years it's been extremely  
15 difficult to get banks to do condo loans for  
16 affordable housing projects. And I wonder if  
17 that's changing. I wonder if that's -- because  
18 most of the affordable homeownership units that  
19 have been produced or will be produced over the  
20 next several years, I'm guessing are going to be  
21 condos. They're not going to be single-family,  
22 not going to be townhouses because the costs are

OLENDER REPORTING, INC.

Toll Free: 888-445-3376

1 too high.

2 MS. FLOWERS: Sure. Yes, this is an  
3 opportunity to talk. Does anybody have a  
4 response to George's question?

5 MR. NIDA: I'd like to respond. In our  
6 case we recognize the constraints that seem to be  
7 growing by the day with conventional market  
8 resources -- secondary market, Freddie Mac and  
9 Fannie Mae. So we're doing a lot more to look at  
10 doing things for our own portfolio and being able  
11 to do condo financing that doesn't necessarily  
12 meet all the criteria of Freddie and Fannie, but  
13 may well meet ours. And so it's something we're  
14 looking at now just to create some additional  
15 capacity, just for that particular market.

16 MS. FLOWERS: But it sounds like then  
17 that's also another barrier, perhaps, that we  
18 need to put up on the board; the barrier of condo  
19 financing for affordable housing. Great.

20 So then we asked developers, what are you  
21 doing in the 80 percent AMI market or less? And  
22 from the survey responses we got sort of two

1 distinct groups, folks who, on an annual basis  
2 are delivering 50 units or less, and folks who on  
3 an annual basis are delivering over 100 units,  
4 with sort of the two bifurcations that we heard  
5 in terms of the survey results. And it was,  
6 obviously, evenly matched.

7           So for the developers, very quickly, if  
8 we could sort of hear on an annual basis, number  
9 of units and types of units that you're  
10 delivering. Are they rental, tax credit, are  
11 they homeownership. Again, focused on your  
12 product that you're delivering at 80 percent of  
13 AMI or below. If you're doing other things,  
14 that's wonderful. But I just want to hear about  
15 the AMI -- 80 percent AMI products or below.

16           So, should we start with Jim? Oh, I'm  
17 sorry. Bob?

18           MR. POHLMAN: No, Jim.

19           MS. FLOWERS: No, Jim. I'm sorry.

20           MR. KNIGHT: Sure. My name is Jim Knight  
21 with Jubilee Housing.

22           I think we fall probably in that 50 or

1 less annually. Our work in recent years has been  
2 scattered clusters of properties that probably  
3 hit that parameter, exclusively rental, primarily  
4 30 percent AMI and below, a few units sprinkling  
5 up to 60, mostly tax credits, concentration of  
6 resident services and supportive services for  
7 very low income families.

8 MS. FLOWERS: Great. Dave.

9 MR. ROODBERG: Ours will fluctuate,  
10 sometimes less, sometimes more. When we do the  
11 affordable they tend to either be part of the  
12 inclusionary zoning, when when we do market rate  
13 deals and on the affordable tax credit deals.  
14 All rental.

15 MS. FLOWERS: All rental.

16 MR. BERNS: So, Robert Berns with City  
17 First Homes. And relatively new on the job; so  
18 three weeks on the job, so I'm gradually getting  
19 up to speed. But previously you've been working  
20 with NeighborWorks America, so definitely in the  
21 housing sector.

22 We're typically below the 50 units, but

1 we do much with the shared equity sector, and  
2 also doing quite a bit on the cooperative sector  
3 side of things.

4 MS. FLOWERS: Okay.

5 MR. BERNS: And a lot of interest in  
6 that.

7 MS. FLOWERS: Okay.

8 MS. DONALDSON: Polly Donaldson with  
9 Transitional Housing Corporation and THC  
10 Affordable Housing, that's our development arm.

11 We are also in that 50 units or less  
12 category and primarily develop mixed income  
13 rental. Our motto has been that one third of the  
14 units of the total units that either had a  
15 combination of local rent supplement programs, so  
16 they are targeted at 30 percent AMI or below.  
17 The others are tax credit up to 60 percent. But  
18 also intentionally developing permanent  
19 supportive housing. So having the services  
20 package as part of it, see the mechanisms that  
21 have developed in this City for that as a real  
22 positive, and as a way to show that these

1 projects work and do provide the resources for  
2 those most vulnerable and in need.

3 We also do primarily rehab and  
4 preservation, have not done new construction to  
5 date, but are looking at some innovative  
6 intergenerational housing with our partner, our  
7 for-profit Buwa Binitie and Dantes Partners, that  
8 he may speak a little bit about.

9 MS. FLOWERS: Great.

10 MR. ROTHMAN: I'm George Rothman with  
11 Manna.

12 Prior to last year we were exclusively a  
13 homeownership builder/developer. I say builder  
14 because we're a general contractor, and now we've  
15 expanded into rental. Prior to the recession we  
16 were doing between 50 and 100 units a year.  
17 Since then, less than 50.

18 MS. FLOWERS: Okay.

19 MR. ROTHMAN: We do have the in-house  
20 capacity, I think, to expand, to double or triple  
21 our capacity fairly soon if we didn't have credit  
22 enhancements or requirements or they were

1 extremely modified to be based on one's track  
2 record and experience.

3 MS. FLOWERS: Okay. Great.

4 MR. COILE: I'm Adam Coil. I'm with  
5 SOME. We do about 100 units a year,  
6 historically. And it should stay around that  
7 range in the last couple years. We focus on 30  
8 percent or less AMI, but usually 10 to 15 percent  
9 AMI, so we really focus on the lower income  
10 units.

11 It's all rental housing and most of our  
12 units are LIHTC units and we rely a lot on pretty  
13 much all the subsidies available from the  
14 District and other sources. Thanks.

15 MS. FLOWERS: Great.

16 MS. KRESKY-WOLFF: Marilyn Kresky-Wolff,  
17 Open Arms Housing. No doubt the smallest  
18 nonprofit developer in the room, I'm sure.

19 We've developed one building and about to  
20 develop another exclusively for women who have  
21 been chronically homeless and who have  
22 experienced mental illness. I think every

1 barrier that you put up there, everything that  
2 everybody has said, including the philanthropic  
3 world, is relevant to us.

4           But I think in terms of what -- I think  
5 what we're trying to figure out is what is the  
6 model going forward for our type of population.  
7 Is it to develop single -- you know, project  
8 based, single-site, or is it to go into  
9 partnering with developers who set aside small  
10 amounts of units within their buildings. And I  
11 think the answer is both; both directions.

12           MS. FLOWERS: Shelynda.

13           MS. BROWN: Hi, Shelynda Brown with CPDC.

14           MS. FLOWERS: If you could speak up a  
15 little bit, please?

16           MS. BROWN: Shelynda Brown with CPDC.  
17 We've produced -- our unit sizes are more,  
18 normally 100 units or more. We operate in the  
19 spectrum -- we've been in business for 25 years  
20 now, so we're at a point where a lot of our  
21 projects are being recapitalized, and we are  
22 looking at opportunities to create more of a mix

1 of incomes and going outside of just the tax  
2 credits, 60 percent limits but hopefully being  
3 able to do some units at 80 percent, and even  
4 doing some set-asides for market rate.

5           And we're also historically been a  
6 preservationist, strictly rental housing. We  
7 will continue to do rental housing but we are  
8 looking at going into new construction and also  
9 doing projects that hopefully have a mix of  
10 incomes.

11           MR. EDMONDSON: Hi, I'm Jim Edmondson  
12 with E & G. We're primarily tax credit  
13 developers. We've been doing it for decades.  
14 Most of our units are tax credit eligible. We go  
15 over 60 percent of median for units to avoid  
16 displacement. We do new construction, rehab.

17           The recent things we've done and will do  
18 are transit oriented. We partner with  
19 nonprofits, we include special needs units within  
20 our deals. We manage our own stuff. We have a  
21 bunch of projects that are coming out of their  
22 initial compliance period.

1           And so preserving those things in a  
2 proper way is going to be a major focus of ours  
3 over the next years.

4           MS. FLOWERS: And vehicle, in terms of  
5 annual units delivered?

6           MR. EDMONDSON: Yeah, we like projects  
7 that are more than 100 units and we have the  
8 capacity to do more than we're doing now.

9           MS. FLOWERS: Got it.

10          MS. ALEXANDER: Good morning. My name is  
11 Jacqueline Alexander. I'm from the Community  
12 Builders. We're a national --

13          MS. FLOWERS: I'm sorry. If you could  
14 speak up, please?

15          MS. ALEXANDER: Sure. We're a national  
16 organization. I'm out of the Mid Atlantic  
17 Region. We are primarily affordable rental  
18 housing developer. Typically have always done  
19 tax credit, now moving to do more mixed income  
20 based on availability of funding.

21                 Our history is we've done a lot of Hope  
22 Six projects and we've transitioned to try and do

1 more public housing type of projects with RADs  
2 and conversions and type of preservation  
3 transactions. We do a lot of new construction as  
4 well, so again, most of our book of business is  
5 100 plus units on an annual basis within the  
6 region, so we do supportive housing. We have a  
7 special unit within our organization called  
8 Community Life. It really looks at residential  
9 services in trying to make sure that not only are  
10 we trying to stabilize housing but also stabilize  
11 families and households.

12           So pretty much like Jim, we're full  
13 service and we have the capacity to do more and  
14 are just trying to look for some more work within  
15 the District.

16           MS. FLOWERS: Great.

17           MR. BINITIE: Good morning. Buwa  
18 Binitie, Dantes Partners.

19           We especially like extremely complicated  
20 deals.

21           (Laughter.)

22           MR. BINITIE: Be it financially or

1 programmatically. You know, Polly alluded to a  
2 deal that we're doing right now that is just  
3 extremely challenging to do. But I think with  
4 both of our minds coming together we're going to  
5 be able to pull it off.

6 Capacity wise, I mean, we are a little  
7 unique because I think we've been successful in  
8 doing and producing anywhere from 100 plus units  
9 across scattered sites. We've just found that to  
10 be very successful, so I think volume wise we  
11 tend to close a little bit more units on an  
12 annual basis than most developing seems to. And  
13 they range from tax credit deals, which we love  
14 to do because we like to preserve and create  
15 affordable units, be it new construction or  
16 renovation. And we do do some homeownership  
17 deals. I mean, we are finishing an affordable  
18 condo right now that is going pretty good and  
19 we'd like to do some more of that.

20 MS. FLOWERS: Great. And, Adrian.

21 MR. WASHINGTON: Good morning, Adrian  
22 Washington, Neighborhood Development Company.

OLENDER REPORTING, INC.  
1100 Connecticut Avenue NW, #810, Washington, DC 20036  
Washington: 202-898-1108 • Baltimore: 410-752-3376  
Toll Free: 888-445-3376

1 We're primarily market rate developers but we've  
2 done about 150 units of affordable in the last  
3 four years so I guess we're right in the middle  
4 of your stack there.

5           Those have been primarily LIHTC. We've  
6 done a couple of small homeownership deals that  
7 have been very successful right around the 80  
8 percent and a little bit higher area, and we want  
9 to increase our portfolio weight in affordable  
10 housing over the next five years.

11           MS. FLOWERS: Great. Great. So I want  
12 to be mindful of our time so I'm just going to  
13 move a little bit more quickly.

14           We did not send out a survey to  
15 government folks, but we did ask folks what  
16 resources they're using thus far, and I want to  
17 just kind of quickly -- if you see some things  
18 that -- this is for our government partners here  
19 -- see something, some source of a financing that  
20 are not up here that you can sort of talk about  
21 so we can make sure we've got the full bevy of  
22 resources available. We don't have anything from

1 the Housing Authority, so we'll be sure to add  
2 that.

3 But other resources. This is what we  
4 heard from developers that they're currently  
5 using. But other things that are not up here,  
6 we'd love to hear from you guys quickly as we  
7 move forward. Mike.

8 MR. KELLEY: Well, in terms of the  
9 alphabet soup there's a bunch of stuff that's not  
10 up here.

11 MS. FLOWERS: Uh-huh.

12 MR. KELLEY: I think it fits in the  
13 category of federal dollars.

14 MS. FLOWERS: Right.

15 MR. KELLEY: A bunch of federal stuff.

16 MS. FLOWERS: Sure. But on the local  
17 level.

18 MR. KELLEY: And locally, again, the  
19 backbone is the low income housing. I mean, the  
20 Housing Production Trust Fund unit --

21 MS. FLOWERS: Uh-huh.

22 MR. KELLEY: -- that brought you here

1 today. But there are -- I guess there's other  
2 tools we have. There's local funds that people  
3 forget, but we do get an allocation of local  
4 dollars that we put into a programmatic use.

5 And let's see. I think that may be --  
6 and then what's not here is sort of the costing  
7 out the ramifications of our regulatory  
8 activities around rent control and around stuff  
9 like that.

10 MS. FLOWERS: Okay.

11 MR. KELLEY: There's a preservation  
12 exercise that goes on that never really gets  
13 captured. But there's a cash value that's  
14 associated with that.

15 MS. FLOWERS: Okay. Yes.

16 MR. BERNS: Yes. We haven't figured out  
17 how to use Rapid Rehousing vouchers as a  
18 financing strategy.

19 MS. FLOWERS: Okay.

20 MR. BERNS: Because initially they're  
21 only approved for four months. Generally they  
22 only last a year. Sometimes a little longer.

1 But we find that 80 percent of the families that  
2 get them are able to pretty much carry on their  
3 rent afterwards. So it's a long-term financing  
4 structure that doesn't fit with banking  
5 standards, I guess. So it's one thing we've been  
6 trying to find out or figure out, is how we can  
7 say, we'll guarantee a virtual unlimited number  
8 of families that can get the Rapid Rehousing, but  
9 we don't know how to incorporate that into  
10 translating into actually development of units  
11 for them to move into.

12 MS. FLOWERS: Okay. Yes.

13 MR. THORNTON: There is an additional  
14 amount of grant opportunities that come through  
15 Justice for Housing.

16 MS. FLOWERS: Okay.

17 MR. THORNTON: And I don't see grants up  
18 there.

19 And the other thing is the --

20 MS. FLOWERS: And those grants, are they  
21 a voucher for an individual or are they something  
22 that you put into deals?

1 MR. THORNTON: They differ. They differ.

2 MS. FLOWERS: Okay.

3 MR. THORNTON: You know, and again, it's  
4 federal dollars that do come through Justice for  
5 Housing. And for the nonprofits, that's  
6 something that the government -- I know with us,  
7 we definitely look to partner in going after some  
8 of those opportunities. So grants is one thing.

9 And the other thing is for the  
10 philanthropy side what they call social impact  
11 bond funding.

12 MS. FLOWERS: Uh-huh.

13 MR. THORNTON: And I don't see that up  
14 there. And that's something that from a  
15 philanthropy side as well as nonprofit, you know,  
16 and government, the social impact bond funding  
17 is, you know, ways of doing deals if you will,  
18 for you know, this specific population that we  
19 talk about.

20 MS. FLOWERS: Great. Yes.

21 MS. TODMAN: Yes, so not as much tools  
22 but in terms of strategies. So we've housed

1 4,000 people in the past three years, and we've  
2 done it a multitude of ways, but it really falls  
3 into three broad categories.

4           The first is, we can't underestimate the  
5 value of our existing public housing stock. I  
6 mean, it is the one true thing. And we'll get to  
7 why it becomes truest. The one true thing that  
8 we have that helps families 30 and under stay in  
9 D.C.

10           And as much as folks like to think, oh, a  
11 lot of it has been torn down, it went from 11,000  
12 it's now 8,300 and we're climbing. So it's a  
13 very important portfolio and we really need to  
14 look at how to reposition it in the way that of  
15 the 8,300, 1,505, there's about 6,800 that really  
16 need to have a strong preservation plan.

17           We have a couple tools out there. We  
18 have New Communities, we have Choice, and we have  
19 RAD. And I want to touch on RAD for a second  
20 because I want all the banking community to get  
21 excited about this.

22           But I think part of it, though, is on

1 that footprint we have tremendous opportunity to  
2 become not just to replace the public housing but  
3 to build affordable and market.

4 MS. FLOWERS: Okay.

5 MS. TODMAN: And that's a huge  
6 opportunity, because --

7 MS. FLOWERS: So there's land value.

8 MS. TODMAN: So there's land value, but  
9 there is just space.

10 MS. FLOWERS: Uh-huh.

11 MS. TODMAN: And so the more housing you  
12 build, the more housing you build.

13 MS. FLOWERS: Uh-huh.

14 MS. TODMAN: I mean, I do believe that  
15 there are some of our sites that really  
16 traditionally have to remain public housing.  
17 There's not a lot of value there; maybe 10 years  
18 out.

19 But right now we have about 10 other  
20 sites that are ripe for opportunity.

21 MR. NIDA: Which ones?

22 MS. TODMAN: That are ripe for

1 opportunity. But what happens is that there's a  
2 funnel to working carefully with public housing  
3 residents. So you know, when you begin to stir  
4 the pot, so to speak --

5 MS. FLOWERS: Uh-huh.

6 MS. TODMAN: -- of hundreds and hundreds  
7 of residents at the same time, you have to do it  
8 in a way that you can actually get it done.

9 MS. FLOWERS: Sure.

10 MS. TODMAN: So I think that looking at  
11 the preservation of what we do is very important.

12 Now how do you do that? So, one of the  
13 tools that's still new, but I think it's huge for  
14 the industry, it's called Rental Assistance  
15 Demonstration. And the reason that it's huge --  
16 I mean, it's going through some congressional  
17 acts right now, but the reason that it's huge is  
18 that it's going to unlock the value of public  
19 housing across -- well, I'm going to say the  
20 city, but potentially across the country, where  
21 right now we can't borrow against our sites. We  
22 can't draw against our assets. This will allow

1 us to do that and get a better and more  
2 predictable operating funding stream for years to  
3 come.

4 I mean, Baltimore has been very  
5 aggressive. They are doing 2,000. I will say,  
6 we're looking at all of our senior portfolio,  
7 which is about 1,800 units. And as a strategy  
8 we're still talking to people and making sure the  
9 pill goes down easy. But that's a huge  
10 opportunity to come.

11 And then of course there's the  
12 redevelopment of certain sites and the ability to  
13 build on top of that.

14 But the other ways that we've housed  
15 folks is clearly through the joint effort of the  
16 NOFA, using our federal, our public housing, our  
17 local vouchers, and our federal vouchers, and  
18 then quite frankly just our attrition and  
19 turnover. I mean, we turn over something like  
20 800 families each year in public housing.

21 So I think it's not just necessarily one  
22 of the new tools, but how do you use the existing

1 tools very creatively in the next five years.

2 MS. FLOWERS: Great.

3 MR. BOWERS: I saw Maria's hand.

4 MS. FLOWERS: Oh, yes. I'm sorry. I am  
5 sorry.

6 MS. DAY-MARSHALL: Maria Day Marshall,  
7 D.C. Housing Finance Agency.

8 One thing that I don't see up there is  
9 our McKinney Act program that we use for  
10 predevelopment funding. We also have a single-  
11 family program, Open Doors, which is available to  
12 prospective home buyers at 120 percent of AMI or  
13 lower.

14 MS. FLOWERS: Okay.

15 MS. DAY-MARSHALL: So those are the two  
16 programs I don't see up there.

17 The other thing that we are looking at,  
18 because most of our -- the average size of our  
19 buildings that we finance, multi-family  
20 buildings, are 75 to 125 units. We are looking  
21 at trying to create a small building program,  
22 where we finance smaller projects. So --

1 MS. FLOWERS: Yes.

2 MR. KELLEY: I'm sorry, Adrienne just  
3 reminded me again -- For those that don't know,  
4 we actually established a sort of unprecedented  
5 memorandum of understanding between our sister  
6 agencies that now look to pool our dollars for  
7 the purpose of what we're calling a super notice  
8 of funding availability that went out just last  
9 April 2nd. And one of the things that allows  
10 this is obviously the higher leveraging and also  
11 the higher, as Polly said a little bit earlier,  
12 opportunity to try to target the resources to its  
13 sort of city needs.

14 But it brings to mind that I'd be remiss  
15 if I didn't recognize the Department of  
16 Behavioral Health and their capital program that  
17 they bring to the game. And the HOP, which is  
18 administered by health, and those dollars are  
19 also brought to the game.

20 MS. FLOWERS: Okay. So --

21 MR. ROTHMAN: But --

22 MS. FLOWERS: Yes.

1 MR. ROTHMAN: -- I have one more to add  
2 because affordable housing couldn't be in the  
3 city, what it is without the resources of LISC  
4 and Enterprise, and other, you know, nonprofit  
5 intermediaries.

6 MR. PASCAL: And the great advocacy of  
7 Bob Pohlman.

8 MR. BOWERS: You'll be first in line for  
9 food at break time.

10 (Laughter.)

11 MS. FLOWERS: Sure. All right.

12 MR. BOWERS: Let the minutes reflect --

13 MS. FLOWERS: Is that what you need to  
14 do?

15 MR. BOWERS: That's all it takes.

16 MS. FLOWERS: Okay. So the last piece,  
17 and this really leads in to what we're going to  
18 talk about after the break, is given who is in  
19 the room, given what the resources are, how do we  
20 move from the amount of productivity that  
21 currently exists in the City to really getting to  
22 the point of that 10 by 20.

1           And to that end we asked about -- we  
2 asked folks in this survey, fundamental question,  
3 do you have more capacity? Can you do more?

4           So and we heard a little bit of this as  
5 we've had this conversation. So, from the  
6 philanthropic community we heard that there is  
7 additional ability to use PRIs. So that's  
8 something that we need to be thinking about when  
9 we're talking about how to address some of those  
10 barriers and how to increase productivity. Is  
11 that from the philanthropic community? That  
12 seems to be an opportunity for increasing  
13 capacity. And that if you can provide to the  
14 donor base some very specific uses for these  
15 funds, ways that those funds will have impact,  
16 that there is a way to target and funnel those to  
17 be more impactful than perhaps they currently are  
18 today.

19           So that's what we heard in terms of  
20 increasing capacity from the philanthropic  
21 community. I don't know if folks are still here,  
22 or if there is any other feedback.

1           So on the -- all the financial  
2 institutions, 80 percent.

3           MS. TODMAN: Can we go back to the  
4 philanthropic?

5           MS. FLOWERS: Absolutely.

6           MS. TODMAN: When we come back into the  
7 room?

8           MS. FLOWERS: Oh, sure.

9           MS. TODMAN: Okay.

10          MS. FLOWERS: Absolutely.

11          MR. KELLEY: Just for the record  
12 purposes, I was really talking about the loss of  
13 Fannie/Freddie foundation dollars that used to be  
14 the real backbone for the --

15          MS. FLOWERS: Right.

16          MR. KELLEY: -- philanthropic, because  
17 now they're --

18          MS. FLOWERS: That's now gone. Yes.

19          MS. DONALDSON: But I also think that in  
20 addition to that, I agree with that and have felt  
21 that pain of course. I will say that the other  
22 way that we're trying to pivot for expansion is

1 through developing a capital -- our own, you  
2 know, making ourselves a target for capital  
3 acquisition fund, or other funds that can help us  
4 move more nimbly in the market and be able to  
5 acquire on the pace that is needed for this, for  
6 a real pipeline that would make the goals. And  
7 I'm sure I'm not the only one who is looking at,  
8 you know, what are some of the ways that the  
9 nonprofit developers particularly can attract  
10 that kind of capital for both the purposes of  
11 mission, but also the purposes of CRA and other  
12 investments needed and mandated.

13 But some might help in that, or some you  
14 know, coordinated effort might be very useful on  
15 that, with a combination of government and  
16 philanthropy. Here they are. But also, and  
17 financial institutions, obviously. I mean,  
18 that's where, you know -- but the idea of each of  
19 us going alone doing that may not make the most  
20 sense in the world.

21 MS. FLOWERS: So we were talking about  
22 increased capacity of the philanthropic community

1 and I think you both touched on that a little bit  
2 when you were speaking earlier, but didn't want  
3 to have that conversation without them in the  
4 room. And is there somebody out there?

5 MR. BOWERS: Yes, from the Cohen  
6 Foundation? Did I see -- no? Okay.

7 MS. FLOWERS: Okay. And so what we said  
8 was that what we heard back from the survey was  
9 that there was a feeling that there was an  
10 opportunity to utilize PRIs in a way that haven't  
11 been used to date or as expansively as they could  
12 be used in support of affordable housing. And  
13 again, that if specific requirements were known,  
14 specific needs were known, and funds were able to  
15 be targeted, that the philanthropic community  
16 would be able to engage in the process in a more  
17 impactful way.

18 So, and again, this is a conversation  
19 about are there opportunities to increase the  
20 capacity of the philanthropic community to  
21 participate in the affordable housing development  
22 in the city.

1 MS. GREINER-LOTT: And I'll just say  
2 quickly that as part of RADs, Affordable Housing  
3 Action Team, we've actually done a lot of  
4 educating of our members in the area of impact  
5 investing specifically. Or generally. And then  
6 more specifically in February we had a program on  
7 impact investing for affordable housing. So it's  
8 definitely something we're trying to get in front  
9 of our membership, help educate them on and  
10 continue to put in front of them so that they are  
11 knowledge and become more interested in it. So  
12 it's definitely a target of ours.

13 MS. FLOWERS: Great.

14 MS. FREEMAN: The only thing that I would  
15 mention is that it's really not increased  
16 capacity, it's shifting capacity.

17 MS. FLOWERS: Shifting.

18 MR. BOWERS: Uh-huh.

19 MS. FREEMAN: Because the pool of money  
20 is the pool of money. And so if there is more  
21 investment in one area there will be less  
22 investment in another area. And I think that

1 that's just -- it's just the math.

2           And so as RAD does more training and  
3 educating of funders around this issue and looks  
4 at how we can invest more effectively I would  
5 say. There is the likelihood, though, that there  
6 is another area that's going to feel the pinch.

7           MR. BOWERS: Can I ask a follow-up  
8 question? I'm sorry.

9           MS. FLOWERS: Sure.

10           MR. BOWERS: To that point, Terri, for  
11 you and Gretchen and from the philanthropic  
12 world, that notion of kind of connecting the  
13 dots, do you think, do you all think, or has  
14 anyone in the room seen, and I'm thinking about  
15 what David said, that making the crosswalk  
16 between funding for housing and often times the  
17 services that come with it, and how that might,  
18 for someone who let's say for example, cares  
19 about education or cares about health, kind of  
20 making that crosswalk to say we can give good  
21 stable housing with services. If we make that  
22 investment here we may get returns in the field

1 of, fill in the blank.

2           Could that be part of a strategy about  
3 how to leverage more dollars -- how to shift some  
4 of the dollars?

5           MS. FREEMAN: I think that has to be the  
6 strategy. I think we have to look at this stuff  
7 as interrelated, not as being in a stovepipe;  
8 that education funders don't do housing, don't do  
9 health, don't do workforce, because it's also  
10 related.

11           But the picture needs to be made clear, I  
12 think, and I don't know that that's been the  
13 case.

14           MS. TODMAN: And I can -- I appreciate,  
15 Terri, what you said about sort of how deep the  
16 waters run in this particular area because I've  
17 been jealous of the Chicago Housing Authority,  
18 that they've had the proper foundation --

19           MS. FREEMAN: Right.

20           MS. TODMAN: -- as a serious sugar daddy.

21           MS. FREEMAN: Right.

22           MS. TODMAN: For years. And really,

1 because what it does, particularly in our  
2 environment, you know, my folks when they  
3 relocate aren't going to relocate to Maryland or  
4 Virginia because they want to stay in D.C. So  
5 the only way to really lift people up is through  
6 services.

7           And I think one thing MacArthur did was  
8 allow CHA to really build on that. So my  
9 question is, how are we able -- are we able, if  
10 we had a nice one-stop package, are we able to  
11 attract foundations, the deep pocket foundations  
12 from outside this area with the next big idea.

13           I mean, is there competition among  
14 regions? The people, you know, the people cross  
15 regions when they're funding it. How would we do  
16 that?

17           MS. GREINER-LOTT: Well, and tell me what  
18 you think about this, but I think for the most  
19 part large national organizations, foundations,  
20 are interested in collaboration, and they are  
21 interested in regional kinds of collaboration.  
22 And not just a focus on one particular

1 jurisdiction.

2           Now I will say that part of our impact  
3 investing program in February, we had a  
4 representative from MacArthur, so I think that  
5 was great to get them here and to see the kinds  
6 of work that we're doing, the kind of funders and  
7 what they're interested in, and the good work  
8 that's happening already. But what still needs  
9 to be done.

10           UNIDENTIFIED SPEAKER: If you could just  
11 speak a little --

12           MS. FLOWERS: Oh, gee, I'm sorry.

13           MS. GREINER-LOTT: But I think that's one  
14 step and another thing that RAD has been doing  
15 recently with our Affordable Housing Action Team  
16 is trying to make that kind of connection between  
17 all the different areas and how they are  
18 connected to housing. We have a series of papers  
19 called, What Funders Need to Know, and we've been  
20 connecting education with housing. We have one  
21 that's coming out soon that's connecting health  
22 and housing.

OLENDER REPORTING, INC.

1100 Connecticut Avenue NW, #810, Washington, DC 20036

Washington: 202-898-1108 • Baltimore: 410-752-3376

Toll Free: 888-445-3376

1           So I think these are some kind of gentle  
2 prodding methods to use with our members, but  
3 that's kind of getting away from your question.  
4 But --

5           MS. TODMAN: You think the opportunity is  
6 there, it just has to be the right product?

7           MS. FREEMAN: I think the case needs to  
8 be very clear --

9           MS. TODMAN: Right.

10          MS. FREEMAN: -- so that we can pursue  
11 our national foundation partners that have an  
12 interest in this region. And it is incredibly  
13 competitive across the country; who gets those  
14 big --

15          MS. TODMAN: Right.

16          MS. FREEMAN: -- foundation investments.

17          MS. TODMAN: Right.

18          MS. FREEMAN: But I don't think it's a  
19 lost cause, but the case has to be really really  
20 clear, and there has to be the local commitment  
21 from the local funding community that we're going  
22 to put something.

1 MS. FLOWERS: Okay. Okay.

2 (Off the record clarification for  
3 scribe.)

4 MR. KELLEY: So I'm just wondering if  
5 part of the case might not be that the  
6 collaboration that's already taken place at the  
7 government level where we just talked about  
8 consolidated RFPs where capital and operating  
9 subsidy and services dollars are coming in to the  
10 project pipeline and so that if philanthropy were  
11 interested in organizing at least a portion of  
12 its existing resources similarly, that we're  
13 really going to place-based solutions where  
14 housing is sort of the organizing principle and  
15 the anchor, and the education and the health and  
16 the other pieces are being sort of built around  
17 it, whether that case that we think is working at  
18 the agency level well right now might also be  
19 transportable to philanthropy.

20 MS. FREEMAN: Yes, I think that's a very  
21 good point.

22 MS. FLOWERS: Okay. I'm going to move

1 quickly. Basically from the financial  
2 institutions 80 percent have said, yes, they  
3 could lend more if a series of those barriers  
4 were addressed. Right. So the rest of the  
5 meeting really is to focus on those barriers, but  
6 to understand that the folks sitting in this room  
7 at the very least, and probably the lending  
8 community more generally, has additional capacity  
9 for affordable housing, has that interest, and  
10 it's just, how do we get them there?

11 We also asked developers. Seven out of  
12 the eight told us that they could do more  
13 anywhere, 50 units or more. A couple told us  
14 between 50 and 100, 100 and 200. Just based on  
15 the people who responded, given the specific  
16 numbers that they provided, about 1,200 more  
17 units annually was thought to be within their own  
18 internal capacity.

19 So again, we're talking about eight  
20 developers in a city of -- you know, you've got  
21 probably 30, 40 that have capacity and experience  
22 to do this work. And so if we're trying, again,

1 to move ourselves from where we are to 10,000  
2 units, and you've got in the room that if the  
3 conditions were right they feel like they could  
4 to about 1,200 more a year, you know, that helps  
5 to get us to where we're trying to go.

6 So again, just trying to lay out what  
7 folks believe the additional capacity is.

8 So here is the key question, right? What  
9 would it take to increase that capacity? Now  
10 this is also in your folders if this is a little  
11 small to take a look at.

12 Unified process for funding supportive  
13 services, expanding SAFI, additional money for  
14 acquisition and carrying costs. Some of these  
15 we've talked about this morning.

16 Private enhancement availability, funding  
17 applications on a rolling basis, trying to deal  
18 with that timeliness issue that folks have been  
19 talking about, flexibility in housing production  
20 trust fund around homeownership units, speaks to,  
21 I think Buwa's point.

22 One of the recommendations from the

1 Bridges to Housing Report was implementing a  
2 local tax credit program. So sort of a  
3 reaffirmation that is a policy direction that  
4 folks think would be helpful, increasing the  
5 affordable unit requirements for public  
6 properties, simplifying the procurement process,  
7 increased transparency for the TOPA process and  
8 additional resources to support those folks, and  
9 a real estate tax exemption for LIHTC properties.

10 MR. BINITIE: Especially the last one.

11 MS. FLOWERS: What did you say, Jim?

12 MR. BINITIE: Oh, no. I said, especially  
13 the last point.

14 MS. FLOWERS: Oh.

15 MR. EDMONDSON: I join him.

16 MS. FLOWERS: So a couple nods for the  
17 real estate tax exemption. Again, you know, we  
18 went through what some of those barriers are.  
19 Here, what folks are saying would increase  
20 productivity, I don't know that there's  
21 necessarily a direct line between the two,  
22 between those barriers and some of these

1 potential actions. But I think that's something  
2 to be thinking about, because if you've  
3 identified a specific barrier and one of these  
4 actions doesn't help you overcome it, we're  
5 missing something.

6 So let's talk about some additional  
7 actions that would help folks. Yes, Adrian.

8 MR. WASHINGTON: I think something that  
9 would be very easy and quick is entitlements.  
10 You could put affordable housing at the front of  
11 the line, in front of market rate. And say, you  
12 could waive fees. You could waive permit fees,  
13 you could waive HUD fees, you could waive a lot  
14 of things and I think it would be very quick and  
15 easy and reduce costs and save time.

16 MS. FLOWERS: Okay. So just to  
17 reiterate, through the PUD process, eliminating  
18 fees, and moving to the front of the line.

19 MR. WASHINGTON: Permits as well.

20 MS. FLOWERS: And permits. Excuse me.  
21 Any thoughts? Other thoughts that would help  
22 folks increase their productivity?

1           MR. BOWERS: I have a question to  
2 actually kind of also throw in the mix. If we  
3 think through that context the lens of leveraging  
4 the money -- and I think, Jim, you made the point  
5 that, you know, in some respects we may -- and  
6 these are my words, you know, we're kind of  
7 spoiled here. And we don't think of it that way  
8 because relative to the need there's still such a  
9 gap.

10           But in the realities that we heard at the  
11 beginning, you know, there's a couple hundred  
12 million dollars now and it's been -- that's been  
13 designated for the Trust Fund in particular, and  
14 then other resources.

15           So there's been a huge infusion of  
16 capital and improvements and processes, Super  
17 NOFAs, other things, building of capacity in the  
18 government side. So at least on the public  
19 sector side there's a huge chunk of money, and  
20 when the Trust Fund Board started meeting back in  
21 the late summer, the deputy mayor -- Deputy Mayor  
22 Hoskins said, look, we essentially -- he said

1 that the Agency has to double its thoroughfare.  
2 Like double its annual production in order to get  
3 to the goals.

4 And so resources have been committed from  
5 a financial standpoint, improvements in processes  
6 have happened. So if we think about where  
7 whatever -- where in philanthropic development,  
8 the banks in the room, intermediaries, whatever,  
9 you know, how do we leverage upon this window of  
10 opportunity where significant infusion of money  
11 and other resources have gone to double to triple  
12 the output, right? I think this is the moment in  
13 time, because to the point that was made earlier,  
14 I think if we wake up in 12 months, 18 months, 24  
15 months and the collective "we" have not really  
16 done that, all the folks scrambling to put money  
17 into the pot will start to say, well, let's put  
18 it somewhere else.

19 So, Jim?

20 MR. EDMONDSON: Just one idea, David,  
21 that I think would be useful that's also, I  
22 recognize, has got political overtones, we need

1 to keep increasing despite the relative advantage  
2 here in the City of having more resources than  
3 elsewhere. We still need to find a way to  
4 increase that pie.

5           If we want to try to hit, for example,  
6 people between 60 and 80 percent of median, which  
7 obviously precludes use of tax credits, that  
8 means we need more soft money in the deal because  
9 delivering units for people at 80 percent of  
10 median is still, the rent income is insufficient  
11 to make the capital numbers work. So you've got  
12 to have an awful lot of soft money in the deals.

13           And we've simply got to increase the  
14 capacity. One means of doing that is by  
15 encouraging market rate developers who have  
16 affordable housing obligations in their very  
17 expensive downtown and uptown units to assign the  
18 responsibility for the deeply discounted units to  
19 somebody like the developers around this table to  
20 produce much less expensive, but still very nice  
21 units in the less expensive parts of town, that  
22 I'm not talking about the worst most troubled

1 parts of Ward 8. I'm talking about other places  
2 where there is less concentration now of  
3 affordable units, but still a need.

4 We could deliver tens of millions of  
5 dollars into an additional HPTF if we allowed  
6 something like that to happen. We're encouraging  
7 that kind of thing to happen in the suburbs,  
8 where the pots of money available are not nearly  
9 so large. It's a matter of choice.

10 If we want to give 10 people in a market  
11 rate unit a lottery ticket that wins for those  
12 units, versus giving 20 or 25 people affordable  
13 units someplace else in town, for me the later is  
14 the way to go. I know it's not a political slam-  
15 dunk, but it sure makes economic and affordable  
16 housing policy sense to me.

17 MR. SIMMS: I think from the point of  
18 that point, Jim is --

19 MS. FLOWERS: If you can say your name?

20 MR. SIMMS: Nathan Simms with DHCD. I  
21 mean, we have a -- I mean, it's a reason why we  
22 see a lot of development in Ward 7 and 8 because

1 that's where the land is. And if you start  
2 looking at how you prioritize it, if you're  
3 talking about west of the river, that is where we  
4 see most of our preservation opportunities going  
5 forward.

6           But I think from a public policy  
7 standpoint, if I say I shifted an obligation and  
8 now this person lives somewhere else, granted it  
9 is an opportunity, but we have a responsibility  
10 as the government to make sure that individuals  
11 have an opportunity to live wherever they choose  
12 throughout the city. And so when we start making  
13 that decision to say, yes, I'm going to shift  
14 this requirement from you to over here, then we  
15 begin to kind of funnel that argument and really  
16 we're saying that you're going to live in other  
17 parts of the city.

18           And so, I don't think that that's  
19 necessarily -- I mean, it's an idea and I'm not  
20 trying to knock your idea, but I think it's not a  
21 good strategy from a public policy standpoint.

22           MS. FLOWERS: Okay. One thing that we

1 heard, particularly financial institutions talked  
2 about the capacity, or they talked about strong  
3 development organizations. So when we're talking  
4 about increasing productivity, getting the  
5 financial institutions to lend some of those  
6 dollars that we have, one of the things that, you  
7 know, I don't really see up here, but we heard  
8 sort of loud and clear was if there were -- and  
9 please correct me if I'm wrong. But if there was  
10 a larger stable of experienced strong developers  
11 developing affordable housing, that would  
12 increase the availability of money from the  
13 financial institutions.

14           And so how do we move to get more of  
15 those organizations in the city and producing --  
16 developing the housing?

17           MR. BAILEY: Some of the things that we  
18 talked about with the Deputy Mayor was pairing  
19 some of our weaker nonprofits or smaller  
20 developers with stronger developers; people that  
21 have already gotten the experience in the market,  
22 or the market rate side, and that could bring

1 more of the beneficial aspect of a nonprofit low  
2 income housing developer to the table. And the  
3 combination of that strength should improve the  
4 financeability of those transactions.

5 MS. FLOWERS: Sorry. Just wanted to take  
6 one more and then we're going to take a break.

7 MR. SIMMS: I mean, just to echo Nelson's  
8 point, I think there is two things. One, the  
9 fact that you had eight responses in terms of  
10 developers in a city as large as Washington, D.C.  
11 with multiple developers.

12 MS. FLOWERS: So --

13 MR. SIMMS: I'm sorry.

14 MS. FLOWERS: -- the survey, just to be  
15 clear --

16 MR. SIMMS: Okay.

17 MS. FLOWERS: The survey was only sent to  
18 the people invited to this meeting.

19 MR. SIMMS: No, I got you. I got you.

20 MS. FLOWERS: Yes.

21 MR. SIMMS: But I'm just saying that  
22 there are a number of developers that we all deal

1 with, or we all know that we don't see involved  
2 in this effort.

3           And so when we talk about capacity, and  
4 that may speak to some of the lending side, the  
5 capacity is, you know, what existing  
6 organizations are out there, what their capacity  
7 is because some of it is -- I mean, like the rest  
8 of the business world there's not a lot of strong  
9 succession planning.

10           The other aspect is who are the new  
11 developers coming into the market who want to  
12 start and support around that.

13           And then there is, how do we engage other  
14 developers who are in our area to be part of this  
15 process. And I said to echo, I think, some of  
16 the comments from the banks, I mean, we know when  
17 people will bring deals to us that they may not  
18 have capacity to do be able to do it, whether  
19 it's financial capacity or just the overall  
20 manpower, or woman power, to get the deals done.

21           So I think some of that has to really --  
22 when you talk about how to really retool the

1 system, that's a huge point.

2 MS. FLOWERS: Okay. Great. And then  
3 Jim, last -- Jim and then Mike will be the last  
4 comment before the break.

5 MR. KNIGHT: So, if I could speak for a  
6 minute on behalf of the modest to sometimes  
7 fragile developers here, capacity can mean a lot  
8 of things. But if one of the major ones is  
9 balance sheet, some of us have been at it for a  
10 long time and do it reasonably well, but have  
11 never had the luxury of a really deep balance  
12 sheet.

13 I think one of the things we've been  
14 trying to talk about in other conversations is  
15 whether there could be some centralization of  
16 risk mitigation. You know, we've talked in one  
17 conversation about the amount of LRSP Subsidy  
18 that has to be held for retenanting reserve, for  
19 instance, if that could be centralized and  
20 allocated across the projects. If credit  
21 enhancements could be done similarly.

22 I'm just wondering if there are

1 enticements like that that would allow banks to  
2 look at groups who are fragile, at least on the  
3 balance sheet side, would that be enough to get  
4 you over a hump, or is it really a lot bigger  
5 than that?

6 MR. PERRUS: If I can respond to that?

7 MS. FLOWERS: Yes, Chi.

8 MR. PERRUS: I would say, Jim, that would  
9 help. But when we look at projects, and  
10 certainly we look at a couple key factors. One  
11 is the ability of the sponsor to execute. I  
12 think that's where pairing or a JV scenario would  
13 make a lot of sense, but also we look at the  
14 project economics on the backend, once the  
15 project is completed. So I think -- so in regard  
16 to some sort of pooling or credit enhancement  
17 structure, I think that coming before City First  
18 Bank, I think that would be helpful.

19 MR. NIDA: In a related why, one of the  
20 other areas of development for moderate and low  
21 income folks is the development of charter  
22 schools in the District. And the District, to

1 support the charter school movement, has an  
2 Office of Charter School Financing and Support,  
3 which provides credit enhancements.

4           We need to do something comparable for  
5 the housing side, because it's the same people.  
6 It's the kids of the families who are looking for  
7 the housing, who need also to have a place to go  
8 to school.

9           And so to the extent that we already have  
10 credit enhancement in a variety of ways with the  
11 charter schools, as many challenges as they have  
12 faced, the issue is, why don't we also have one  
13 for the housing? Because one interesting thing  
14 is where we see the charter schools coming up in  
15 some of the neighborhoods in which they're  
16 locating, their very presence is stabilizing  
17 those neighborhoods now, and is actually  
18 influencing housing stability. So it's just --  
19 we've already done the model. We just have to  
20 apply it into a different field.

21           MS. FLOWERS: Great. Mike, last word  
22 before the break.

1           MR. KELLEY: Yes, which is really more  
2 philosophical. And so, marketing urgency, I  
3 think, is a key action that would increase  
4 productivity. You heard from Director Pohlman  
5 and Director Berns this morning about just a bit  
6 of the need.

7           And then Reverend Dr. Bowers talked about  
8 if you had your neighbor drowning, would you not  
9 reach in and save that neighbor? The urgency of  
10 the situation we have right now is something that  
11 this forum is really great at, but in terms of  
12 like do we just go home and go back to our  
13 individual tank commands, or do we somehow  
14 mobilize this effort and make it larger. And so  
15 it's an overall larger sense of urgency for the  
16 entire community.

17           MS. FLOWERS: Okay. So we're going to  
18 take a 15 minute break that will bring you back  
19 about noon. Don't go too far. I think we're  
20 going to be focused on getting to solution.

21           MR. BOWERS: Ladies and gents, real  
22 quick. Real quick. Can we just say another word

1 about what will happen after the break? If we  
2 can have your attention for just one quick  
3 second? We just want to make it clear what's  
4 going to happen after the break, because this is  
5 going to be critical for us.

6 MS. FLOWERS: Okay. So, you all are  
7 taking a break and I'm going to be talking with  
8 these good folks up here, and we're going to  
9 write down some of those ideas and when we come  
10 back we're looking for specific actions to help  
11 some of -- move some of the ideas forward.

12 MR. BOWERS: That's great. So we'll see  
13 you at noon. Thank you.

14 (Recess from 11:43 a.m. until 12:04 p.m.)

15 MR. BOWERS: All right. Ladies and  
16 gentlemen, we appreciate you sticking with us to  
17 move towards the -- we are back on the record;  
18 back convened. We really appreciate the  
19 conversation this morning in the first part of  
20 the meeting, and again in the lens of really  
21 trying to be in a solution oriented mode, not  
22 just having conversation for conversation's sake,

1 but to really try to move towards specific types  
2 of items that people can move on, and a reminder  
3 of what we said at the beginning. Things that  
4 the Housing Production Trust Fund Advisory Board  
5 can consider as recommendations, for us to mull  
6 over at our meetings, that we could potentially  
7 make to the city is one.

8           Second, recommendations or action steps  
9 that people can take to either your own  
10 individual institution or group that you may  
11 belong to. So whether it's the grant makers,  
12 communicate foundation, metro bankers, or whether  
13 it's, you know, United Bank or Manna or CPDC or a  
14 specific agency.

15           And then third, if there are one-on-one  
16 connects, if you heard something here today and  
17 you know that you could help solve that issue for  
18 the partner in the room, then obviously make that  
19 one-on-one connect.

20           So with that let me turn it back over to  
21 Marisa.

22           MS. FLOWERS: Great. Thanks, again for

1 sticking with us. So very quickly, this isn't,  
2 you know, everything that we heard, but we wanted  
3 to get a couple of key things together that we  
4 can actually focus on for the rest of the day,  
5 and we've got about 45 minutes. And so we picked  
6 five things that came up today and of those five  
7 things, old school, we're going to try to work it  
8 out on this board and really get to what needs to  
9 get done to address this, how can it happen, and  
10 one of the biggest things to walk away from as  
11 David said, is the who.

12 So, where can this lie? It might lie  
13 with HPTF Advisory Board, it may lie with an  
14 agency head in the room. It may lie with a group  
15 of bankers. So we really want to try to get to  
16 that, or some combination thereof, right?

17 So we really want to try to get to that.  
18 Maybe, do you think dimming the light made it a  
19 little easier? If you don't mind? Thanks so  
20 much. Okay.

21 Hopefully that's a little bit easier and  
22 we can send this out. We just did this,

1 obviously while we were sitting here during the  
2 break.

3           So, it sounded like there was a bit of  
4 conversation in there around enticing the  
5 philanthropic community larger than what is  
6 necessarily in the city today, but to be a part  
7 of the affordable housing process.

8           And that would really help to address  
9 some of those barriers that we talked about,  
10 around both supportive housing and, excuse me,  
11 services for supportive housing as well as  
12 potentially opportunities to fill some of that  
13 gap financing, predevelopment and otherwise.

14           So, we began to have that -- Adrian began  
15 to have that conversation, Terri began -- we  
16 started talking about that but we'd like to flush  
17 that out a little bit more.

18           So, getting to the who, how, the what,  
19 who, and how, how could we move this ball forward  
20 in terms of getting those folks, so there are  
21 some concrete ideas and things that we think  
22 could -- steps that could be taken?

OLENDER REPORTING, INC.

1100 Connecticut Avenue NW, #810, Washington, DC 20036

Washington: 202-898-1108 • Baltimore: 410-752-3376

Toll Free: 888-445-3376

1 Terri, can I put you on the spot?

2 MS. FREEMAN: Well, you can.

3 (Laughter.)

4 MS. FREEMAN: Whether or not I have a  
5 good answer is a whole other issue.

6 I mean, I guess the what is, what's the  
7 case that we're trying to push forward. And if  
8 we could look at what you were talking about,  
9 that's a part of it. But I think there is a need  
10 for some more, what I call cross-sector  
11 conversations around this, identifying what the  
12 priorities are, coming up with something that's  
13 really solid. We can't just run out to these  
14 national funders with a half-baked idea. This  
15 really has to be something that is well thought  
16 out, and we probably need to bounce it off of a  
17 couple of our national friends before we actually  
18 push it out.

19 So I think we're talking about developing  
20 a case in a cross-sector environment identifying  
21 who are the likely national funders. And whether  
22 or not we have some local champions, is the way I

1 would describe it, that could be helpful. Daniel  
2 is gone. Did Daniel leave?

3 MS. FLOWERS: And is this conversation  
4 already -- is there some group that already  
5 exists that is having this conversation anyway,  
6 or that you feel like this conversation would  
7 naturally fit into?

8 MS. FREEMAN: I'm sorry? Can you say  
9 that again?

10 MS. FLOWERS: I was asking, is there some  
11 sort of a group, group or groups, that's  
12 beginning this conversation that this type of  
13 conversation would naturally fit into?

14 MS. FREEMAN: Yes.

15 MS. GREINER-LOTT: Yes.

16 MS. FREEMAN: Yes.

17 MS. FLOWERS: Okay.

18 MS. FREEMAN: From the funding  
19 perspective, yes. Cross-sector --

20 MS. GREINER-LOTT: We're working on that  
21 too, yeah.

22 MS. FREEMAN: Okay.

1 MR. BOWERS: And that would be the RAD,  
2 is that right?

3 MS. FREEMAN: Right.

4 MR. BOWERS: Washington Regional  
5 Association of Grant Makers. Alright, so the RAD  
6 would be that group.

7 MS. FLOWERS: And who would need to be in  
8 that conversation?

9 MS. GREINER-LOTT: Well, who would need  
10 to be in that conversation?

11 MS. FLOWERS: Who is not currently in  
12 that -- so you said the funders are having that  
13 conversation. Who else from perhaps the folks in  
14 this room or maybe not, would need to be in that  
15 conversation?

16 MS. FREEMAN: It's likely a subset of  
17 folks that are in this room, and then maybe the  
18 addition of some other corporate folks as well.

19 MS. FLOWERS: Yes.

20 MR. PASCAL: Well, I think a lot of  
21 conversation is being done at the program officer  
22 level, and I think it needs to be done more at

1 the -- and no disrespect because I'm at that  
2 level too, but it needs to be done more at the  
3 leadership level of corporations and foundations  
4 and things like that. It really -- the decision  
5 makers, I think, needs to be more engaged.

6 MS. FLOWERS: Okay. So given where  
7 things are today, how could that happen? Are  
8 there some concrete steps?

9 MS. GREINER-LOTT: I think there are some  
10 steps that are already in the works a bit. I  
11 don't want to say too much about those, but I  
12 think the group that's currently meeting around  
13 affordable housing within our membership  
14 definitely knows this needs to be a cross-sector  
15 approach, and is working on a couple of  
16 different things to learn from business what it  
17 is they want to -- what they need, what they're  
18 interested in, what they're concerned about  
19 regarding, you know, these new workforce and the  
20 income levels, et cetera.

21 So I think there are some different steps  
22 in the works currently.

1 MS. FLOWERS: Uh-huh.

2 MS. GREINER-LOTT: But I'm happy to hear  
3 more from this group about what else could  
4 happen.

5 MS. FLOWERS: Bob.

6 MR. POHLMAN: Well, no, just to be  
7 specific about one thing, obviously if we're  
8 going to have a transition in the District of  
9 Columbia, in leadership and in the Mayor's  
10 office. And so after November there will be, as  
11 usual, I'm sure, a transition report, a  
12 transition strategy. It would seem to me that  
13 would be a good time to look ahead to the next  
14 four years and it would be great if philanthropy  
15 and others could be involved in putting forward a  
16 model.

17 I look at King County, Seattle, for  
18 example. Of course you have the Gates Foundation  
19 there, which helps. It does help.

20 But if there were national funders  
21 similar to that who could come on board, I mean,  
22 you know, there's a critical mass of stuff

1 happening here. There's a consensus around long-  
2 term funding of the Trust Fund. We don't have it  
3 all in place yet, but a very very significant  
4 local commitment. We have a consolidated RFP, an  
5 MOU, similar to what they have there. We have  
6 issues and problems that are public and well  
7 known that need to be solved.

8           So if ever we were going to do something  
9 like this now would be in the next -- by the end  
10 of the year would be the time to really start  
11 doing it.

12           MS. FLOWERS: Other thoughts?

13           MS. DONALDSON: Yes, and I think it's  
14 you, Terri, who mentioned this as a subset of  
15 this group, that the conversation in addition to  
16 funders would benefit like, with the session that  
17 I think CNHED hosted with providers and others to  
18 try to really try to bring forth some ideas, not  
19 just from a, you know, here's my handout, help me  
20 out. But more what really are the community-wide  
21 initiatives or ideas that need to be discussed  
22 and part of the thinking.

1           And so not to keep us all in our, you're  
2 a provider, you're there, or you're a developer,  
3 you're there, or you're a funder, you're there,  
4 but to try to help bring that together.

5           MS. TODMAN: And I would say, you know,  
6 there is a continuum that doesn't happen at the  
7 lower income levels, so many of my residents  
8 have, even if they could get a better job or a  
9 job, there is no landing place for them. There  
10 is no housing stock that they can graduate, so to  
11 speak, out of public housing too easily.

12           And clearly, like I said, having that  
13 stock available for the folks behind, maybe  
14 David's people or somebody else, keeping that  
15 continuum going is key. And so I think that  
16 there is some thought that we can have about how  
17 do we very intentionally begin to look at the  
18 families who are the at the very lowest income  
19 scale. Not homeless. Very lowest income scale,  
20 into some sort of continuum that gets them moving  
21 into another product type.

22           And I think that's where philanthropic

1 dollars can be immensely helpful in terms of  
2 creating that platform.

3 MS. FLOWERS: So that's part of building  
4 the case.

5 MS. TODMAN: Right.

6 MS. FREEMAN: And I might just add that  
7 as we look at the who, that we figure out how we  
8 include folks who are affected; that we're not  
9 just talking to each other and looking at it from  
10 our perspectives; that we actually talk to people  
11 who have to deal with this stuff on a daily basis  
12 because sometimes our sense of what should be  
13 might be great for our reality but may not work  
14 for theirs.

15 So I think somehow we have to figure out  
16 how you do that, you know, comfortable,  
17 nonthreatening way for all parties involved.

18 MR. THORNTON: I want to add to that too,  
19 to really look at some of the success; some of  
20 the successful models, some successful  
21 individuals who have come out of poverty and gone  
22 into homeownership. They are the ones that we

1 really need to be talking to. You know, folks  
2 who have gone through public housing and now are  
3 homeowners and things of that nature.

4 MS. TODMAN: And we have a ton of those  
5 folks. It's really taken it to scale. So we  
6 have -- you know, we have lots of great stories  
7 like that. But I'm talking, taking to a scale  
8 that's much more exciting.

9 MS. GARR: Now are we assuming that a  
10 part of that conversation would be what I would  
11 consider the change agents, the trade schools,  
12 the colleges and universities that are going to  
13 create educational opportunities so that these  
14 individuals can increase their income potential  
15 so that they have the necessary resources to move  
16 to the next level of housing? Are we assuming  
17 that they're going to be a part of that  
18 conversation, or do we feel that that's someone  
19 else's issue to address?

20 MS. TODMAN: When you talk about  
21 supportive services, I think that's a part of the  
22 conversation. The question is how big is the

1 conversation.

2 MS. GARR: Right.

3 MS. FREEMAN: Because the bigger it gets  
4 the less is going to get done. So I think we  
5 have to figure out, you know, who are the  
6 critical -- what are the critical pieces and I  
7 was just saying to Gretchen, we kind of need to  
8 find our national counterparts and say, what are  
9 the things that are going to really make you say,  
10 ooh, and figure it out from that perspective.

11 MS. TODMAN: Well, to answer your  
12 question, yes. Those organizations are involved.

13 MR. BOWERS: I see. I know Maurice is  
14 scribing. I saw Buwa's hand and then Bryan.  
15 Buwa and Bryan.

16 MR. BINITIE: Yeah. I'm a little -- I  
17 guess for me, when you're sort of thinking about  
18 making an ask, are we speaking specifically to  
19 capital and services dollars? I guess that's  
20 sort of what would sort of help me understand  
21 what it is that we're looking for our  
22 philanthropic partners to do. And where do they

1 think the hot buttons are for the folks that make  
2 up that group? Like are they more sort of going  
3 to go in bricks or mortar and being able to see  
4 it fully and touch it? Or at they sort of more  
5 going to go in the elements of how, and what we  
6 do to make people become self-sufficient in their  
7 continuing growth.

8           And on top of that I think the one thing  
9 that I always like to say as far as making a case  
10 for the District is, I don't know if there's  
11 really much in a case of -- I mean, if you look  
12 at the District and you look at like just pure  
13 raw data, like pure raw data from our standpoint  
14 is we experienced the lowest foreclosure in the  
15 District in the country.

16           MS. FLOWERS: Right.

17           MR. BINITIE: That's number one. Number  
18 two, we are almost second to New York and San  
19 Francisco in the number of applications per unit  
20 that are put on the market. So for example, we  
21 have a 90 unit senior building on the market now,  
22 we have 545 people on the waiting list, right,

1 and we have not started marketing.

2           So if you look at all those raw datas  
3 that are out there in the marketplace today, can  
4 we use all of that information to help make a  
5 fuller case to say, look, there is an affordable  
6 housing crisis that is occurring in the District  
7 of Columbia alone, and that's why we have also  
8 the capital markets in the form of, you know, are  
9 debt lenders coming in and giving us extremely  
10 favorable debt? Are equity investors coming and  
11 giving us extremely favorable equity investment,  
12 because they want to invest in the District of  
13 Columbia.

14           MS. FREEMAN: I think that we have to --  
15 well, I think your first point, funders typically  
16 are more interested in the later than the  
17 former --

18           MR. BINITIE: Okay.

19           MS. FREEMAN: -- when you talk about  
20 bricks and mortar. They're more interested in  
21 the service side of things.

22           MR. BINITIE: Okay.

1 MS. FREEMAN: But again, we may be  
2 approaching some funders that may be interested  
3 in bricks and mortar.

4 MR. BINITIE: Okay.

5 MS. FREEMAN: I think the other potential  
6 here is look at this through an equity lens.  
7 When you look at the data, and you say that, you  
8 know, this is disproportionately affecting a  
9 particular population, that too, then, is  
10 something that can be of interest to a national  
11 foundation.

12 MR. BINITIE: Okay. Thank you.

13 MR. BOWERS: Bryan?

14 MR. DICKSON: Yes, I think Director  
15 Kelley and Buwa mentioned one key word that we  
16 should be focused on, it's marketing. The way to  
17 bring people together is through effective  
18 marketing strategies.

19 What we need to do is develop a point  
20 person to help us identify a marketing strategy  
21 to coordinate bringing people together in the  
22 philanthropic community, if it's nationally, with

1 local partners.

2           You know, this sort of also plays into  
3 the second bullet point up there with regard to  
4 joint ventures. You know, public private  
5 partnerships, I think, are very critical in  
6 addressing many of the problems that we're  
7 talking about today. And you have to have a  
8 strategic approach to bring together the public  
9 sector with the private sector. And we've made  
10 tremendous progress, I think. You know, I think  
11 Adrian, the Public Housing Authority is a great  
12 example of successful private partnerships in  
13 redeveloping, you know, the sites that you're  
14 focused on right now. The loss of capital  
15 quarter is an example of that.

16           But we really need to be deliberate and  
17 strategic about bringing people together, and you  
18 know, the way to do that is through marketing and  
19 to bring in expertise that can focus on bringing  
20 all the stakeholders together to solve the  
21 problem.

22           MS. FLOWERS: So I think -- thank you

1 because you helped us to transition to point  
2 number 2.

3           And let me sort of step back and just  
4 say, this is the beginning of a conversation. I  
5 don't want folks to feel like, you know,  
6 everybody is sort of super rushed, but we did  
7 want to try to at least hit the next few of these  
8 and get everybody out of here on time. But this  
9 is an initial conversation that will continue  
10 with the advisory board as well.

11           So the next piece to your point about  
12 increasing sort of that stable of qualified  
13 experienced developers that also have the  
14 financial wherewithal to execute deals. And so  
15 we heard -- I think we heard some good ideas  
16 during the conversation around this connection,  
17 this JV connection, whether it's nonprofits and  
18 for-profits, newer developers with more  
19 experienced developers. Also this idea that Jim  
20 had around pooling some of these resources and  
21 deals whether it's for credit enhancements or  
22 around reserve requirements.

1           And then Tom made the point about the  
2 charter school model. So again, if we start  
3 talking about who can do this, how can it happen,  
4 and sort of I think and the what, we'd like to  
5 get back to that. Mike?

6           MR. KELLEY: Well, I think it's a  
7 responsibility on the government's side a little  
8 bit to make sure that it's a welcoming  
9 environment. You know, you want to make sure  
10 that -- you know, if we're going to attract more  
11 folks in we have the responsibility of making  
12 sure that they know what the responsibilities  
13 are, and make it as easy for them to be  
14 successful. You talked about earlier, about  
15 permitting processes or the processes within, you  
16 know, our shop or Adrian's shop, or other places  
17 that we actually have to meet them halfway.

18           MS. FLOWERS: And so when you say  
19 government, specifically DHCD, or --

20           MR. KELLEY: No. Well, unfortunately I  
21 think it's all of us. But and I think that,  
22 again, Nick Majett did a great job in terms of

1 the permitting thing, and Rita Marshall (ph) has  
2 done a really cool -- all the stuff that we're  
3 all kind of doing. But it's really now telling  
4 the world, we're doing this. And --

5 MS. FLOWERS: So getting back also to  
6 that marketing piece --

7 MR. KELLEY: Yeah.

8 MS. FLOWERS: -- letting folks know  
9 what's going on.

10 MR. KELLEY: Uh-huh.

11 MR. BOWERS: Adrian Washington had a  
12 specific recommendation earlier about the notion  
13 of affordable housing projects, kind of having  
14 fees waived and moving to the front of the line.

15 MS. FLOWERS: And we have that on there.

16 MR. BOWERS: I was wondering like in  
17 terms of who specifically, like is that something  
18 -- is that a mayoral decision, is that the DCRA  
19 Director decision? Kind of who would pull the  
20 trigger on that one?

21 MS. FLOWERS: I mean, it's --

22 MR. BAILEY: It would be the DCRA

1 decision in consultation with the mayor's office.  
2 So the approval would have to be granted by the  
3 mayor.

4 MR. BOWERS: I'm sure there might be a  
5 specific kind of who to go to with what.

6 MR. KELLEY: And I'm sure there's a  
7 financial sort of tie-in to that too, that just  
8 would have to be recognized.

9 UNIDENTIFIED SPEAKER: Right. Exactly.

10 MR. BAILEY: Right. Yes, there's going  
11 to be an economic cost. There's going to be some  
12 sort of --

13 UNIDENTIFIED SPEAKER: fiscal analysis.

14 MR. BAILEY: fiscal analysis.

15 MR. BOWERS: Tom Nida, I saw you --

16 MR. NIDA: Just an obviously here, of  
17 maybe playing a little off of what Adrian said  
18 earlier. You know, when you think about  
19 compliance -- now I think about compliance a lot  
20 from a banking standpoint, but I think about  
21 compliance like with having a mandated number of  
22 ADUs in a new project, and the art of compliance

1 is always about how little can you get done to  
2 get by?

3           And so if you really want to make it  
4 something where it becomes somebody's line of  
5 business, or maybe a subline of business, you  
6 have to give them some incentives. Whether it's,  
7 you know, some kind of tax break or something  
8 else, where there's something in it for them so  
9 that they're no longer looking at how little can  
10 I do, but maybe how much more could I do, and it  
11 still make economic sense.

12           MR. BOWERS: Tom, let me ask a question  
13 to that point, and I know it's a little bit off  
14 this second bullet, but the notion of for the  
15 banks -- specifically for the regulated banks  
16 that are in the room and beyond, you know, a lot  
17 of banks are going to be motivated by CRA.

18           MR. NIDA: Uh-huh.

19           MR. BOWERS: And it's going to like, you  
20 know, either let's try to get the minimum, or  
21 some are trying to get the highest score. And so  
22 I guess there are kind of two questions that come

1 to mind.

2           One is, how to motivate banks that are  
3 strictly CRA driven to want to get to the highest  
4 level of CRA. And then secondly, how do we  
5 motivate from a kind of business standpoint if  
6 you would, but also going beyond the just dollars  
7 and cents, motivate banks to do more than just  
8 what's required from a CRA standpoint? Is there  
9 a way to get that.

10           So if a bank hits -- you know, if they've  
11 got to do \$100 and they've done \$100 but there is  
12 potential to do more in this space with the  
13 resources that are available, are there ways to  
14 motivate banks to go beyond that, the CRA  
15 requirements?

16           MR. NIDA: I think it's within the  
17 regulatory framework for the commercial banks.  
18 It's going to be based on good solid economics,  
19 that if you have CRA perceived as something  
20 that's kind of like a giveaway grant making, you  
21 know, it's a lost leader kind of thing, you're  
22 always going to get the minimum possible.

1           To the extent that it becomes something  
2 that a lender, be it a bank or -- and the other  
3 regulated institution sees as a viable line of  
4 business where the economics work, the economics  
5 can get better with things like credit  
6 enhancement or private public partnerships with  
7 local government. Things like that so it takes  
8 the risk down, because what the banks are all  
9 about now is risk management. And their risk  
10 tolerance since the recession has dropped  
11 dramatically.

12           And so what you've got to do is come up  
13 with ways to mitigate those risks, even if it's  
14 not forever; if it's just initially, to get them  
15 over a threshold of some kind so that then a  
16 project just floats on its own. And you know,  
17 the risks have already been addressed and  
18 resolved.

19           But right now the risk models for most  
20 banks are seeing a lot of things where the  
21 economics are uncertain. We're not going there  
22 because we'll get hammered by the regulators, and

1 it won't be the CRA guys that are hammering us.  
2 It will be the guys on the safety and soundness  
3 that are going to hammer us.

4 And so there's two different sets of  
5 examiners, if you will, that are not always  
6 talking out of the same playbook.

7 MS. GARR: But I guess then, David, I  
8 would add to that. But then then the other part  
9 that we don't verbally monetize is the public  
10 image piece to how good of a partner or a  
11 neighbor that we are. And so monetizing that can  
12 create some interesting scenarios.

13 So when you're telling the story and the  
14 value added as far as who is the good neighbor  
15 and the good partner in helping to change and  
16 create better communities, because we all want to  
17 be looked at through a positive lens, because at  
18 the end of the day it generates more business  
19 flow outside of these affordable housing deals.

20 MR. BOWERS: Thank you.

21 MS. FLOWERS: Does anyone have a specific  
22 recommendation from Tom, I'd like to maybe just

1 explore that a little bit using the charter  
2 school model. Can you talk maybe a little bit  
3 more and then see --

4 MR. NIDA: Oh, sure.

5 MS. FLOWERS: -- if we've got some  
6 feedback from folks in the room?

7 MR. NIDA: Well, if you understand the  
8 dynamics of charter schools in this city, there  
9 is not enough affordable school space in the  
10 city. It's the same as there's not enough  
11 affordable housing space in this city.

12 And so what the city did for the charter  
13 schools to help offset that was to be in a  
14 position to create a separate facility allowance  
15 that went on a per people basis, and then they  
16 created a whole new office within OSSE that deals  
17 with providing sub debt, or doing working capital  
18 credit lines, or guarantees to conventional debt  
19 so that the schools lacking enough equity to do  
20 conventional financing had something to buffer  
21 that and get the conventional lenders over that  
22 hump.

1           So the combination of something that  
2 underpinned their collateral value, as well as  
3 something that underpinned their cash flow  
4 requirements was the model. And it just struck  
5 me that, you know, it's all about affordability.

6           You know, in this fine city if you don't  
7 have a surplus school you can move into that's  
8 really ready to go, you're going to spend a ton  
9 of money and you take too much money away from  
10 the educational piece to provide the space.

11           We have the same scenario here with  
12 housing. It's just we need to look at crossing  
13 the line and saying, because these issues are  
14 similar and they affect the same people, then we  
15 ought to have some common thread of resolution.  
16 And maybe what they did with OSSE, you know, with  
17 charter schools could be applied in a different  
18 but similar way for the housing issue. And maybe  
19 what we need to do is get the Deputy Mayor of  
20 Education and the Deputy Mayor of Planning and  
21 Economic Development to have a conversation about  
22 that.

1 MS. FLOWERS: Any other thoughts around  
2 the room on that idea?

3 MR. BOWERS: I'm curious from the banks  
4 that are -- the banks and the financial  
5 institutions, banks and intermediaries that are  
6 in the room, if that kind of structure existed  
7 that mitigated risk, is there a sense that folks  
8 would potentially do more lending if, as Jim  
9 said, those who are the Mighty Mouses, so to  
10 speak, you know, who had good heart and good  
11 intent and the ability to execute but didn't have  
12 the biggest balance sheets, if there were ways to  
13 mitigate that risk do you all think your  
14 institutions would potentially let more capital  
15 flow?

16 MR. PASCAL: The short answer is yes.

17 UNIDENTIFIED SPEAKER: Uh-huh. Yes.

18 MR. PASCAL: I mean, we've done several  
19 charter school transactions where OSSE and  
20 Operation Hope were up on the front and shored  
21 them up and provided enough credit enhancement so  
22 that they got enough sufficient track record so

1 that when they got into the more operating  
2 fashion the cash flow was comfortable. And so  
3 the short answer is yes.

4 MR. DICKSON: Yeah, and I think, you  
5 know, when you lower risk, you know,  
6 fundamentally lending institutions should be able  
7 to improve economics.

8 Tom was talking about the fact that once  
9 banks meet their CRA goals then economics come  
10 into play. So that would go right to that point  
11 in terms of reducing risk enabling financial  
12 institutions to develop a little bit better  
13 economics on a transaction.

14 MR. NIDA: I want to be clear, too, with  
15 the enhancements that you see out of OSSE and  
16 some of those things for the charter schools,  
17 these are not forever enhancements. They're set  
18 up so that when certain performance benchmarks  
19 are achieved they burn off or burn down.

20 And so you can recycle the same money,  
21 you know, project after project. Once they've  
22 hit a record, a level, where they perform on

1 their own without backing.

2 MR. BANKS: Tom, is there any way that --  
3 I'm sorry.

4 MR. BOWERS: We'll go to Jim and then  
5 Jeff.

6 MR. BANKS: Is there any way that you  
7 could just general, back of the envelope, what  
8 kind of percentage of costs, percentage of risk,  
9 kind of enhancement needs to be there? What's  
10 the value of it?

11 MR. NIDA: I think it depends on how much  
12 equity is coming in to a deal. I mean, that's  
13 the basic economics of it.

14 So if you have a situation where you've  
15 got a nonprofit developer that may be challenged  
16 to do convention 20, 25 percent equity, like we'd  
17 see in a market rate deal, then you may need to  
18 have on the short-term, just some level of equity  
19 support or placement until, you know, the  
20 performance for the cash flow then kicks in.

21 You know, and it could be, you know,  
22 something more or less than that, but the idea

1 from the charter school standpoint was that  
2 between what you've got from OSSE and what you  
3 have from organizations like Building Hope and  
4 other credit enhancers that are using federal  
5 funds for the same purpose, that schools with no  
6 equity are going in with conventional financing  
7 and this other stuff layered on top of it, and it  
8 just burns down over time as the schools perform,  
9 because the schools have to get their enrollment  
10 first. And then they have to perform  
11 academically.

12 MR. KELLEY: That's helpful. I'm just  
13 trying to get a sense of ballpark, what it would  
14 cost.

15 MR. BANKS: On X amount, if we've got  
16 \$187,000, or a million dollars in trust fund  
17 going into leverage total development cost of X,  
18 is there some way to --

19 MR. NIDA: I think if you put it in a  
20 pool where you could have it so that you tap a  
21 pool, not necessarily transaction by transaction,  
22 you could probably come up with a pool that might

1 be, I don't know, pick a number, 10 percent of  
2 that total to be enhanced. And then you spread  
3 the risk because in the pool you're mitigating  
4 risk already. You know, you're going to have  
5 some players are going to be a little stronger  
6 than some others.

7           The other thing that comes with a pool is  
8 if you've got a project that isn't going to work  
9 because you have a sponsor just not as effective  
10 as they could have been, you might have a  
11 stronger sponsor steps right in through the pool  
12 to take over and then keep it going.

13           MR. BOWERS: So I saw Jeff Banks, and I'm  
14 going to actually ask -- Bill Batko is here, and  
15 Bill, I'm going to ask if you don't mind taking  
16 two or three minutes to say a little bit about  
17 some of the research that you've done on behalf  
18 of the Agency that kind of ties directly in to  
19 some of this, because I think it speaks to some  
20 of this. But, Jeff --

21           MR. BANKS: Yes. The city -- to answer  
22 your question, David, yes, the banks would

1 participate more.

2           The city has a program, the cash  
3 collateral support program and we're doing it for  
4 the businesses right now, and that's up to a  
5 million dollars for small businesses that are  
6 CBEs. And it has stimulated more deals being  
7 done in the city.

8           MS. FLOWERS: And that program is through  
9 who?

10          MR. BANKS: Deputy Mayor Hoskins, here.

11          MS. FLOWERS: It's through DMPED?

12          MR. BANKS: Yes.

13          MS. FLOWERS: Okay.

14          MR. NIDA: Yes, but it's under DISB if  
15 I'm not mistaken.

16          MR. BOWERS: DISB. Yes.

17          MR. NIDA: The Department of Insurance  
18 Securities and Banking.

19          MR. BOWERS: Department of Insurance  
20 Securities and Banking.

21          MS. FLOWERS: Oh.

22          MR. NIDA: Yes, and that, by the way,

1 also played off the charter school model earlier.

2 MR. BOWERS: And you said it's called the  
3 cash collateral program?

4 MR. NIDA: Cash collateral support  
5 program.

6 MR. BOWERS: Support program at DISB.  
7 Okay. Thank you.

8 Bill Batko, and then (indiscernible).

9 MR. BATKO: Sure. For the past four or  
10 five months I've been working as a consultant  
11 with the HCD on many of the ideas that have been  
12 surfaced here. The basic idea provide -- DHCD  
13 provide credit enhancements to be able to  
14 mitigate risk for the banks so that increased  
15 amount of bank capital will go into deals.  
16 Decreased amount of DHCD money will go into those  
17 deals. And so then DHCD money, the prime  
18 resource for affordable housing, can go to more  
19 deals.

20 Where we are now is looking at two  
21 different efforts. One is an acquisition pool  
22 and expanded SAFI, based on some of the

1 structures that were set up by some of the CDFIs  
2 in different cities with banks to be able to  
3 attract bank capital into acquisitions with a  
4 DHCD and CDFI guarantee, so that essentially we  
5 mitigate, we think, all risk on behalf of the  
6 banks, so that they're more interested in doing  
7 the acquisition which right now DHCD funds  
8 itself.

9           The important components of this would be  
10 agreed upon underwriting so that DHCD, the banks,  
11 and the CDFIs all agree upon what deals should be  
12 financed. And importantly that deals financed  
13 for acquisition look to have take-up, that  
14 there's permanent lenders who are interested in  
15 this deal who are sitting around the table and  
16 want to then go ahead and move with the deal.

17           So that's on the acquisition front. On  
18 the permanent front we met with people from OSSE  
19 a little while ago based on recommendations from  
20 some of our bank friends who have been using the  
21 program, who are comfortable with the program, an  
22 so we're looking toward launching -- this would

1 be deal by deal, maybe just to start, where  
2 essentially a very similar kind of mechanism can  
3 be put in place five years with a burn-off, with  
4 DHCD providing the gap financing as they always  
5 do as a way to get banks to provide funds,  
6 capital funds, for deals that right now they're  
7 not interested in or for deals they are  
8 interested in already to provide financing with  
9 slightly lower fees, slightly lower interest  
10 rate, slightly lower debt service coverage, so  
11 that there is a little more private capital into  
12 the deal, still affordable for the deal. Little  
13 last DHCD gap money into the deal, and then DHCD  
14 money being able to extend elsewhere.

15 In a couple weeks, week and a half we're  
16 starting a working group on this. Any of the  
17 banks and any of the CDFIs that I haven't talked  
18 with already, by all means, I'd love to talk.

19 MR. BOWERS: All right. Thank you, Bill.

20 MR. KELLEY: And if I can, this is in  
21 terms of you know, putting a promise out there.  
22 There has been a group, a working group that

1 we've been working with, the TOPA people and  
2 other providers and developers and we've made a  
3 commitment to get this act together by, you know,  
4 mid June, summertime, and have it fully  
5 operational by the fall. So in terms of the  
6 urgency I talked about, this is something that we  
7 really welcome, this particular meeting because  
8 it sort of kick starts up that commitment that  
9 we've made to the larger community.

10 MS. FLOWERS: Oh, I'm sorry. Sorry about  
11 that. I was giving you more time.

12 (Laughter.)

13 MS. FLOWERS: Great. Okay. Any other  
14 thoughts on this idea about increasing capacity  
15 for developers, or managing capacity in a way  
16 that makes the sponsor agency more attractive for  
17 banks? Yes.

18 MR. KNIGHT: So, in the land of the  
19 earliest risk money and the predevelopment money  
20 and that sort of thing, is there any sort of  
21 centralized risk mitigation that would draw more  
22 private money into that use, or is that a lost

1 cause? How could we get more predevelopment  
2 money in circulation?

3 MR. BOWERS: And I think that's a  
4 question for the banks, but also for the  
5 foundation world to think, you know -- Terri, to  
6 your point earlier, most would be more concerned  
7 about services than the bricks and mortar. Would  
8 there be a mechanism to even open up potentially  
9 some predevelopment pool of capital from the  
10 philanthropic world, almost like in a recoverable  
11 grant mode. So if they're in the business of  
12 doing grants saying, okay, you know, let's make  
13 it more of a revolving grant pool. If worst case  
14 scenario happens then the deal doesn't go  
15 forward, it burns off as a grant. But if the  
16 deal does go forward that money gets repaid and  
17 recycled. And so that's -- so just for banks and  
18 for philanthropic as we think about  
19 predevelopment.

20 MS. FLOWERS: So we've touched on some of  
21 these, which is good because we've got only about  
22 five minutes. But we've touched on some of these

1 other categories but I want to quickly go through  
2 just a couple.

3           Let's start with the last one, to the  
4 urgency idea because I feel like that has gone  
5 through a couple of the different things that  
6 we've talked about. And, Mike, you talk about  
7 this demonstrating urgency of the need, right?  
8 So we had some people around the table even this  
9 morning with the presentation sort of from being  
10 surprised at some of the data from either of  
11 those presentations, illustrating the urgency for  
12 affordable housing, both sort of generally given  
13 job growth as well as for the very low income  
14 folks.

15           And also this sense of urgency as you  
16 said, Tom, about you know, this could have a real  
17 sort of concrete impact on appraisal and other  
18 underwriting if people understood that perhaps  
19 there is not a bubble, particularly for folks  
20 developing housing for people earning under 80  
21 percent of AMI; sort of what that need really is.

22           And we've talked about marketing has come

1 up, several times in this conversation about sort  
2 of how to get all of these things out there, both  
3 within the community of folks that are in this  
4 room and people that are doing similar things in  
5 this room, but also larger.

6           So just maybe five more minutes talk  
7 about perhaps what's already being done, and  
8 really sort of what that that next level is of  
9 kind of getting that word out. Right.

10           MR. PASCAL: Well, one thing is, you know  
11 -- the business leadership has not been at the  
12 table and we've been trying that, and we've had  
13 frank conversations where they actually think  
14 it's not an issue of urgency. And we do have a  
15 new head of the D.C. Chamber of Commerce, so  
16 maybe some of us have relationships with the  
17 person, you know, try to take this opportunity of  
18 new leadership to say it's a very important  
19 issue.

20           We have new leadership at the Meyer  
21 Foundation, and so I think we have to engage some  
22 of this new leadership that's coming in place and

1 make the case that it is an important issue,  
2 because some of them don't think it's the number  
3 one. They think, still, education and other  
4 issues is the -- and they're important issues.  
5 Don't get me wrong. But those are the more  
6 important issues affecting them, versus this  
7 issue, quite frankly.

8 MS. FLOWERS: And so who would be the --  
9 who are the right folks to do that, to engage in  
10 that conversation if we're talking about the who,  
11 trying to get to concrete.

12 MS. TODMAN: Members of the Chamber. The  
13 Chamber membership, who may be here. Or not  
14 here.

15 MR. PASCAL: And then we have Lisa, and  
16 the new head of DCBIA that we have a relationship  
17 with, and so there's a lot of new leadership and  
18 we need to get in front of them.

19 MR. BOWERS: I have a question actually  
20 on that, to the who. How responsive would the --  
21 I guess two questions. One, to the corporate  
22 business community, kind of not including

1 developers, not including banks, kind of folks  
2 who are in the industry, is there an ask? And  
3 I'm looking at -- you know, like, what's the ask  
4 to that community? Would we be asking them to  
5 put money on the table? Would we be asking them  
6 to get engaged in advocacy around the issue?  
7 None of the above, all of the above?

8           And then to the issue of who would they  
9 listen to? Part of it is their members, but like  
10 would they -- if a collection of bank leaders  
11 went and talked to folks in the corporate world  
12 would they be more apt to listen to their, kind  
13 of quote/unquote, business peers? You know?

14           So in other words, does it need to be  
15 government leaders, bank leaders, philanthropic  
16 leaders, or a small cadre who go and talk to, you  
17 know, the Marriotts or the big defense, you know,  
18 corporate folks and the big hospitals, et cetera,  
19 et cetera.

20           So I'm wondering kind of, what's the ask  
21 to them and who would they listen to? Tom?

22           MR. NIDA: You know, we bankers have got

1 this reputation of being the hardest to convince  
2 of anything when it comes to spending money. But  
3 it also gives us credibility. When we do  
4 approach somebody about an issue, we tend to have  
5 people listen.

6 MR. BOWERS: Uh-huh.

7 MR. NIDA: And we tend to be a little bit  
8 more focused on who we should talk to, you know.  
9 And so you know, I think that some element of  
10 some of us in this room and otherwise in the  
11 banking field, probably could add some  
12 credibility to whatever the ask is going to be to  
13 the corporate leaders more broadly. And I think  
14 we ought to probably be joined by some government  
15 officials who also have credibility, so that it  
16 looks like it's a top-level private pulpit  
17 partnership.

18 MR. BOWERS: Yes.

19 MR. NIDA: And then the developers and  
20 the others that are going to be perhaps  
21 recipients of some of this don't necessarily want  
22 to be there up front.

1 MR. BOWERS: Right.

2 MR. NIDA: But they ought to be able to  
3 help support, you know, the size of the ask and  
4 perhaps the terms of it.

5 MR. BOWERS: That's helpful.

6 MS. FLOWERS: But developing what that  
7 ask is, I mean, that's --

8 MR. BOWERS: Yes, like we're --

9 MS. LIEBERMANN: That's what I was going  
10 to say. I mean, it's this whole marketing piece.  
11 What are we asking? Are we saying you're not  
12 going to have employees because they're not going  
13 to live close? I mean, you have to figure out  
14 what the ask is and I think it's a lot about  
15 that.

16 MR. BOWERS: Bob and Nathan?

17 MR. POHLMAN: Yes, I agree on what the  
18 ask is because regardless of what the impact is  
19 on business, what are we saying? What are we  
20 asking them to do, to build housing? No. Are we  
21 asking them to support more revenue? I doubt it.  
22 They've never shown a willingness to do that in

OLENDER REPORTING, INC.

1100 Connecticut Avenue NW, #810, Washington, DC 20036

Washington: 202-898-1108 • Baltimore: 410-752-3376

Toll Free: 888-445-3376

1 the past. I wouldn't expect it in the future,  
2 i.e. pay our taxes.

3           So what are we asking? The only thing I  
4 can see is a greater allocation of the existing  
5 resources to housing. So that, to me, would  
6 probably be the ask.

7           MR. SIMMS: I think the ask is a little  
8 different because as much as we talk about  
9 housing, we talk about how we can make their  
10 deals more attractive, and when you look at parts  
11 of the city that are where the lowest income  
12 concentrations are, I mean, the retail corridors,  
13 the business corridors, those corridors are  
14 fairly barren.

15           And so if there is an ask it is really  
16 putting the focus in community development, which  
17 real estate is part of that. So how can we help  
18 support small business development or large -- I  
19 mean, small and then large business developers in  
20 areas that will help create mixed income  
21 opportunities because back to the appraisal  
22 thing, I mean, particularly in Ward 8, I mean, we

1 see a lot of low income census tracts. But one  
2 of the things that comes up is, you know, how do  
3 we get people at the higher income levels to live  
4 in here? And when you're underwriting  
5 transactions you're going to go off the  
6 information in front of you. If there is some  
7 kind of targeted effort and coordination about  
8 building those pieces I think we are much better  
9 off.

10 I mean, we are fortunate in some ways  
11 that usually when a Target or a Wal-Mart or  
12 something is announced, then it takes off  
13 immediately. And so it's very hard to get  
14 control of cost and rising rents and things of  
15 that nature. But if there is some kind of  
16 targeted effort that says that we're going to  
17 invest in this housing stock, will you invest in  
18 this quarter, I think that you get more bang for  
19 your buck.

20 MR. KELLEY: If I can, just in terms of  
21 the ask too, we talked about the local low income  
22 housing tax credit. Whose going to buy these

1 credits, I think is something that I think we  
2 should be honest about, and before we kind of go  
3 down a primrose path let's do some sort of  
4 analysis. And this would be a good -- I think  
5 that, you know, this would be a good check-in.  
6 You know, who are the local heavy hitters that  
7 want to invest.

8 MR. POHLMAN: That's a great point. Now  
9 we probably will have a state -- you know, a D.C.  
10 low income housing tax credit come fall. And  
11 getting investors is going to be an issue. The  
12 tax credit is going to have value, and that is  
13 something very specific that banks and others who  
14 have franchise taxes and so forth in the  
15 District, could respond to. That would have a  
16 direct impact on affordable housing. It will be  
17 two and a half million, I think, a year, which  
18 will build up to 25 million in 10 years. And  
19 that's a huge additional resource.

20 But how valuable are those credits going  
21 to be will depend on if there's a market for  
22 them.

1 MS. FLOWERS: Okay. So we are at 12:50,  
2 David.

3 MR. BOWERS: Yes. Yes.

4 MS. FLOWERS: So, I think again, we  
5 weren't able to necessarily hit all five, but I  
6 do think that we were able to get some meat on  
7 the bones for a number of these.

8 Again, we've got amazing notes from these  
9 excellent folks up here, so none of the comments  
10 were lost.

11 Just so you know, next up is a report out  
12 of this meeting of the salient points, both what  
13 has come up here as well as what's incorporated  
14 in those notes that will go back to the Advisory  
15 Board, and then I am sure will be distributed.

16 Yes, Buwa.

17 MR. BINITIE: I think there's another  
18 group of folks that I think we need to think  
19 about. I'm sorry, you were writing when I had my  
20 hand up.

21 And I think those groups -- and if you  
22 bear with me for a second I think the National

1 Association of Restaurant Owners, the National  
2 Association of Hotel Owners, especially all the  
3 food truck drivers out there, and I just want to  
4 sort of quote research I recently found, and this  
5 is sort of what I've been using recently.

6           Recently the MSA employment projections  
7 by industry and occupation over the next 10 years  
8 from 2008 to 2018, published that D.C. Department  
9 of Employment Services is expecting to see a two  
10 percent year over -- a two percent increase in  
11 healthcare, social services, hospital  
12 associations, arts, leisure, hospitality,  
13 entertainment, recreation subsectors, and these  
14 subsections make up over 100,000 of the current  
15 workforce. So that's 20,000 jobs over the next  
16 10 years.

17           So these groups, I mean, these are folks  
18 that we are catering to as far as folks we're  
19 trying to provide housing for. These are your  
20 pillars of society, your restaurant workers, your  
21 waitresses, you know, folks who work in  
22 nonprofit.

1           So I think all those associations are  
2 folks that frankly -- I mean, if we went to the  
3 Marriot today, they are putting in a 1,000  
4 bedroom convention center; that's 1,000 jobs. I  
5 mean, these folks would care about trying to  
6 figure out a way to house their employees.

7           MR. NIDA: Playing off of that and maybe  
8 coming back to I think what Bob talked about  
9 about the ask.

10          MS. FLOWERS: Uh-huh.

11          MR. NIDA: Every corporate leader out  
12 there is going to have an interest in recruitment  
13 and retention of their own employees.

14          MS. FLOWERS: Right.

15          MR. NIDA: And fundamentally that's what  
16 this gets down to.

17          MR. BOWERS: So, folks, we have five  
18 minutes and then we're going to get you out of  
19 here before 1:00, actually. I'm going to ask --  
20 Director Kelley has got a couple quick words for  
21 us and then I'll close this out and we'll be out  
22 of here.

1           MR. KELLEY: Well, just to get into in  
2 terms of the Mayor's commitment to 10,000  
3 affordable housing by 2020, we're well on the  
4 way. We've got 29 projects under construction.  
5 We've got another 50 projects or so that are in  
6 various forms of underwriting, about 3,000  
7 additional units are being teed up. We have  
8 about \$600 million on the street and that we're  
9 looking at having 180 million of that is sort of  
10 consolidated stuff with CDBG and HOME and that  
11 kind of thing, 140 million of it is the Housing  
12 Production Trust Fund.

13           So your taxpayer dollars is at work. And  
14 I think that this is really just -- this  
15 discussion is really important, though, but I  
16 think it's in the context of, we're already kind  
17 of ramping up. So this is like really vital wind  
18 behind a sail that's already put up.

19           And so I just want to thank the Housing  
20 Production Trust Fund Advisory Board, HPT -- for  
21 pulling this together. And again, in terms of  
22 the follow-up, it really would be good to keep

1 you, our partners, abreast about what we're up to  
2 here so we can actually potentially revisit this  
3 issue and reset our navigational points after a  
4 certain amount of time here in the fall and in  
5 the winter.

6 MR. BOWERS: Appreciate, Director Kelley,  
7 your comments.

8 A couple things in closing. A few  
9 things. One, in building on the point from the  
10 Director, this was absolutely designed to be a  
11 solution to oriented conversation that is  
12 grounded in the recognition that there are  
13 literally tens of thousands of people in the  
14 Nation's Capitol who are struggling every day to  
15 make it. And so we want to ground this  
16 conversation, like we do all of our  
17 conversations, in how can we help the city  
18 leverage the resource of the Trust Fund, as well  
19 as other resources dedicated to affordable --  
20 housing that's affordable, low and moderate  
21 income people in particular, in the most  
22 effective and efficient ways?

1           So the report, the kind of write-up of  
2 all of this, if you will, that Marisa will do, we  
3 will share with folks. The Board, we will  
4 absolutely digest that at our next meeting.  
5 We'll have another presentation next month. But  
6 we'll digest that and see if there are again,  
7 specific things that we can recommend to the  
8 City. And I think we've heard a couple things  
9 here.

10           The second thing I would say is I do hope  
11 that if folks have heard things -- and I'll just  
12 pick out a one for example, that came out early,  
13 which is the data that we got from Dr. Howell,  
14 Tom's point about hey, maybe everyone in the  
15 banking industry, some may be aware, others may  
16 not, finding ways to share that. Those are the  
17 kinds of things that that's not the Board doing,  
18 but that information will be out there, it will  
19 be shared, and so for any of you all and your  
20 respective individual organizations or collective  
21 working group, please feel free to kind of move  
22 forward with some of these things in ways that

1 right? And people aren't always going to hear  
2 what they want to hear, but it's good where  
3 people can actually hear the honest stuff.

4           And then say, okay, if that's your  
5 reality and this is my reality, how do we move  
6 forward in ways that might -- and somebody else  
7 in the room may be able to raise their hand and  
8 say, hey, I may be able to help solve for that  
9 person's issue that will help them when they go  
10 there. So it's in that spirit.

11           Last 60 seconds. Here we go, one, thank  
12 you huge word of thanks, and if we can give a  
13 hand to Marisa Flowers for doing a great job with  
14 our facilitation.

15           (Applause.)

16           MR. BOWERS: It has been great on the  
17 front end and great today, and I know a lot of  
18 pressure trying to keep the trains moving and  
19 moving on time. So a huge word of thanks to  
20 Marisa from Green Door Advisors.

21           Again, I want to say a huge word of  
22 thanks to B. Fields, Pamela Hillsman, Angela

1 Nottingham from DHCD, Director Kelley, your team  
2 has been tremendous. So if we can give him a  
3 hand?

4 (Applause.)

5 MR. BOWERS: I also want to thank the man  
6 on the ear plugs there, Brian. Is that right?  
7 So, Brian, we want to thank you because there's a  
8 lot of moving pieces.

9 And then finally, I hope I have this  
10 right. So Tanya Condell, Chris Dickersin-  
11 Prokopp, Lesley Edmond, Carissa (sic) Sookhoo?

12 UNIDENTIFIED SPEAKER: Cassia

13 MR. BOWERS: Who?

14 UNIDENTIFIED SPEAKER: Cassia.

15 MR. BOWERS: Cassia. Sorry about that.

16 And Lauren Pair. And then Bruce Richardson who  
17 is our IT photographer. But a huge word of --  
18 they were turning around stuff quickly, so thanks  
19 to all of them. Thank you all very much.

20 And finally, thanks to each of you for  
21 giving of your half day on this Monday for coming  
22 out. We really appreciate it.

1 Don't forget if you have additional  
2 questions or comments on the bottom of your  
3 agenda, B. Field's e-mail address is there. You  
4 can e-mail public comments or questions to her  
5 and now at 12:57 this meeting is official  
6 adjourned.

7 [Whereupon, at 12:57 p.m., the Housing  
8 Production Trust Fund Advisory Board meeting  
9 concluded.]
